Predictive Services Discussion: Widely scattered showers and thunderstorms will continue across the Four Corners states with isolated thunderstorms lingering in Nevada and California. A few thunderstorms will develop over the northern Rockies and into the northern Plains. Scattered showers and thunderstorms will continue over much of the Southeast and Mid-Atlantic states. Windy conditions will develop over parts of the West. Temperatures will cool slightly across most of the West with a cold front pushing into the Northwest. Hot conditions will continue across the Plains and the Southeast. Mild weather will linger over the Midwest and New England. Alaska will continue to see showers and a few thunderstorms across most of the state.
Temperatures will remain cool across the North and South with mild to warm conditions in the eastern Interior.

# MANAGING VEHICLE TRAFFIC IN SMOKE 

Vehicles/Roads Category

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.
- Identification of important, public roads that may be impacted by smoke.
- Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area.
- Identification of alternative traffic routes as part of the incident/project traffic plan.
- Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice.
- When potential smoke-related problems are identified:
- Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
- Notify local law enforcement units and highway departments of a potential problem.
- Implement preplanned actions such as posting smoke warning signs.
- Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
