# National Interagency Coordination Center <br> Incident Management Situation Report <br> Monday, August 1, 2016-0530 MT <br> National Preparedness Level 3 

## National Fire Activity

Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Light (196 new fires)

Area Command Teams Committed: 0
NIMOs committed: 1
Type 1 IMTs committed: 5
Type 2 IMTs committed: 6
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

Predictive Services Discussion: A cold front will move through the Northwest and northern Rockies. Scattered thunderstorms will develop over the Four Corners states with isolated thunderstorms possible over higher terrain in southern Nevada and southern California. A few showers will move into northwestern Washington. Scattered thunderstorms will form along and ahead of a cold front from the Upper Midwest to the Mid-Mississippi Valley. Scattered thunderstorms will also form in the Southeast and along the Mid-Atlantic. Temperatures will remain very hot across the Plains, the Southeast and the deep Southwest. Mild to warm conditions will continue over the Midwest and New England. In Alaska, scattered showers and a few thunderstorms will develop over the northern and southern coasts with dry and warming conditions in the Interior.

# UNBURNED FUEL BETWEEN YOU AND THE FIRE 

Operational Engagement Category

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation \#11. Often it is not possible or practical for direct attack on a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire or are you in contact with someone who can? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- Are weather indicators constantly changing?
- To reduce the risks:
- Post lookouts
- Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
