Predictive Services Discussion: Scattered showers and thunderstorms will linger from Washington to North Dakota. Scattered thunderstorms will develop in the afternoon in the central and southern Rockies. Scattered rain and thunderstorms will continue over the Gulf and Mid-Atlantic states. Temperatures will remain mild across the Northwest and the Upper Midwest to New England. The far Southwest will remain hot as will the southern Plains. Warm and humid conditions will continue in the Southeast. Scattered showers and a few thunderstorms will form over southern Alaska and spread northward late in the day. Temperatures will remain warm across the North and the Interior, mild in the South http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

## THUNDERSTORM SAFETY

Weather / Fire Behavior Category

Thunderstorms cause significant hazards for wildland firefighters, including downbursts that can cause extreme fire behavior and lightning. When thunderstorm development is likely, lookouts should be posted and aware of signs of a developing storm. A sudden reversal in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature may note the mature stage of a storm. Heavy rain, hail and lightning occur only in the mature stage of a thunderstorm. During a storm, use the following guidelines:

- Do not lie down.
- The best position is sitting on the pack or crouching with feet close together.
- Avoid sitting directly on the ground, if possible; but, if necessary, keep feet and butt close together.
- Avoid grouping together. Keep a minimum of 15 feet between people when possible.
- Removing caulk boots will not provide safety if stocking covered or bare feet are then in contact with the ground--don't bother!
- "Stay out of dry creek beds" is correct for flash floods, but has nothing to do with lightning.
- Handheld radios (with short rubber antennas) or cell phones are safe to use. Communication is vital to crew safety. Do not use land line radios or radios with elevated antennas.
- Wide, open spaces are better than trees or clumps of trees in the vicinity. Ridge tops, etc., should be avoided.
- If you feel the hair on your arms or head "stand up," there is a high probability of a strike in the vicinity. Crouch or sit on a pack.
- Put down all tools.
- Take shelter in vehicles if possible.
