Predictive Services Discussion: Widely scattered thunderstorms will form over the Interior West, mainly over the mountains but also over the northern Great Basin. Scattered rain and thunderstorms, heavy at times, will continue across the South from Texas to Virginia. Scattered showers and a few thunderstorms will move across the Great Lakes and New England. Temperatures will be warm across most of the country with hot weather in the desert Southwest and the Central Valley of California. Mild conditions will continue over the Midwest and New England.

HELICOPTER LANDING AREA SAFETY<br>Aviation Category

The following points should be considered when operating around an unimproved landing site:

- Always wear your personal protective equipment (PPE) when working around an operating helicopter. (Eye, hearing, head)
- Always get the approval of a flight crewmember or the pilot before approaching an operating helicopter.
- Only approach and depart a helicopter as directed, in a slightly crouched position, and in full view of a crewmember. Keep in pilot's field of vision at all times.
- Never go near the tail of helicopters.
- When loading helicopters in uneven terrain, always approach and depart from the down slope (lower) side and do not hold equipment overhead.
- Remove or secure loose articles prior to working around an operating helicopter.
- Be aware of the dust abatement conditions of the landing area, as blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous.
