Predictive Services Discussion: A cold front will push through the Rockies and the Plains and extend to the Great Lakes. Showers and thunderstorms will develop along and ahead of the front, heavy rain and strong thunderstorms from Texas to the Ohio Valley with showers in the Midwest. Scattered thunderstorms will also form across much of the East and Southeast. Scattered afternoon thunderstorms will form over the southern Rockies and extend toward Arizona. Isolated thunderstorms are also possible along the Sierras. Temperatures will be cool to mild across much of the central U.S. from the Rockies to the Appalachians. Warm weather will persist over the rest of the country except for very hot conditions along the West Coast and desert Southwest.
