Predictive Services Discussion: Scattered thunderstorms will form over the high terrain of the Four Corners states. Isolated thunderstorms will also form along the southern Sierras. A few showers will linger in the far northern Rockies. Locally windy conditions will continue across parts of the northern Rockies and the northern Plains. Scattered thunderstorms will develop in the central Plains and along the Gulf Coast. Cool conditions will cover most of the northern half of the West and mild weather will continue in the Northeast. The Plains and the South will remain very warm, while hot conditions continue in the desert Southwest.

## Leading Up

Leadership Category

Looking out for our people includes not only those who work for us but also our leaders and peers. Leadership is about influencing others to accomplish tasks that are in the best interest of our organization which often means influencing those above us and leading up. Similarly, we are open to upward leadership - and, in fact, encourage and reward it.

- Fire leaders are expected to lead in many directions, an expectation that increases complexity and risk.
- Summoning the courage needed to intervene and influence peers or leaders above can be difficult, especially if providing unwelcome feedback about behavior or pointing out an alternative to a potentially bad decision.
- In high-risk environments, no one can afford to assume that anyone has all the answers.

To build the kind of healthy and resilient culture required in the wildland fire service, we lead up holding our leaders accountable, providing unvarnished situational awareness in challenging situations, and offering unbiased and viable alternatives.

## Discussion Points

- How can we practice leading up?
- Describe a situation where leading up took place. How was the situation affected?
- Describe a situation where there was opportunity for leading up but it was not done. How was the situation affected?
- Discuss leading "laterally": influencing peers or those with similar responsibilities.
