Predictive Services Discussion: Scattered thunderstorms will develop across the southern and central Rockies. Scattered thunderstorms will continue across the Gulf Coast and increase over Florida with the approach of a tropical wave. Scattered showers and a few thunderstorms will linger over the Upper Midwest. Drizzle and light rain will move into the Northwest Coast. Temperatures will be warm over most of the country except cool over the Rockies and the Northwest Coast and hot in the desert Southwest.

## Escape Routes

Operational Engagement

It's 1400 ...you have been working all morning. How far away have your safety zones become? Safety zones are only good if you can reach them. How long will your escape route take? What is the condition of the crew? How long will it take your slowest member to get there? Are your expectations realistic?

Look at the times below...if your fire blew up right now, can you and every member of your crew make it to your safety zone?

Have an idea? Have feedback? Share it.

[^0]:    * Willow, Tuolumne-Calaveras Unit, Cal Fire. Two miles east of San Andreas, CA. Timber, chaparral and short grass. Active fire behavior with uphill runs, short-range spotting and isolated torching. Numerous residences threatened.
