

**National Interagency Coordination Center
Incident Management Situation Report
Friday, December 23, 2016 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Dec. 16 – Dec. 22)

Initial attack activity:	Light (200 new fires)
New large incidents:	9
Large fires contained:	6
Uncontained large fires:**	3
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

**Uncontained large fires include only fires being managed under a full suppression strategy.
[Link](#) to Geographic Area daily reports.

Southern Area (PL 1)

New fires:	189
New large incidents:	8
Uncontained large fires:	3
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

* **Tentan**, Oklahoma DOF. Eight miles northeast of Colegate, OK. Hardwood litter. Active fire behavior with creeping.

* **Living Lane Road**, Southeast Area, Oklahoma DOF. Four miles southeast of Idabel, OK. Timber. Active fire behavior with short crown runs and running.

Cobbly Nob, Tennessee DOF. Ten miles east of Gatlinburg, Tennessee. Dormant brush, hardwood slash and hardwood litter. No new information. Last report unless significant activity occurs.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: Another strong system will bring snow to the Pacific Northwest and Northern Rockies Friday and Saturday and a mix of valley rain and mountain snow to other locations across the West including the drought starved areas of California and Nevada. On Christmas Day, a major winter storm is possible across the Northern Plains. Portions of the Central Plains could experience icy conditions. A weaker, but cold and windy system will move into the Pacific Northwest and Northern Rockies Tuesday bringing more mountain snowfall while a second system moves south along the coast of Southern California triggering showers along coastal areas. Showers are expected across the Southern Plains and Ohio River Valley Wednesday as the Subtropical Jet Stream pumps in Gulf moisture that will be collected by a passing front that will bring moisture to the Southeast by Thursday.

UNINFORMED ON STRATEGY, TACTICS OR HAZARDS

Operational Engagement

Firefighters who are uninformed on strategy, tactics or hazards are in conflict with Watchout Situation #5. Before going to the fireline, it is imperative that firefighters obtain information about strategies, tactics or hazards by asking themselves the following questions:

- Can communications be established to find out strategy, tactics or hazards? Discuss ways you might establish communications; for example, contacting someone who is already on the fire and asking them what tactics and strategies are working or not working, what hazards they have witnessed, etc.
- Can scouting safely identify potential hazards? Talk about different methods of scouting a fire (e.g., using a lookout from your crew or sending a line scout ahead, utilizing air attack or the spotter on a smokejumper airplane). Discuss what types of hazards you might come across and ways you would mitigate them. For example, arriving at a fire after dark and a being instructed to dig line downhill with the fire below. How could you make this a safe situation?
- Have strategies, tactics or hazards changed since last informed? Discuss situations that might alter the way you are fighting a fire (e.g., wind shifts, resources you expected don't arrive, etc.). Also, think about what new hazards can develop while you are on the fireline (e.g., roots burning out and trees coming down, winds shifting direction and speed, etc.)
- Can you get a briefing from your supervisor? Talk about the importance of constant communications and ensuring firefighters are on the same page with strategies and tactics. For example, if one crew decides to do a burnout, but doesn't let the crew at the other end of the line know what they are doing, then what can happen?
- To reduce the risks:
 - Post lookouts.
 - Determine escape routes and establish safety zones.
 - Consider retreating until you are informed.
 - Don't leave a staging area or operational briefing until you have all the pertinent information. Emphasize ways to inform firefighters about strategies, tactics and hazards. Tell a story about when you were uninformed and what you did to correct the situation so that you were safe.
 - Use the Incident Response Pocket Guide standard briefing

Have an idea? Have feedback? Share it.
