

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, May 25th, 2017 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (94 new fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires:**	1
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	0

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southwest Area (PL 3)**

New fires:	15
New large incidents:	1
Uncontained large fires:	0
Type 1 IMTs Committed	1

**Pinal**, Tonto NF. IMT 1 (Day). Six miles south of Globe, AZ. Active fire behavior with backing, flanking and short-range spotting. Structures threatened. Road and area closures in effect.

**Kerr**, Gila NF. Started on BLM land six miles south of Aragon, NM. Short grass and timber. Moderate fire behavior with creeping and backing. Last report unless significant activity occurs.

\* **Snake Ridge**, Coconino NF. Thirty-four miles southeast of Flagstaff, AZ. Timber, brush and short grass. Moderate fire behavior with isolated torching and short-range spotting. Last report unless significant activity occurs.

**Southern Area (PL 2)**

New fires: 13  
 New large incidents: 0  
 Uncontained large fires: 1  
 Type 1 IMTs committed: 1  
 NIMOs committed: 1

**West Mims**, Okefenokee National Wildlife Refuge. Unified command between Florida IMT 1 (Leneave) and NIMO (Quesinberry). Sixteen miles southeast of Fargo, GA. Timber and southern rough. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Campfire**, Florida Forest Service. Twenty-two miles west of Coral Springs, FL. Southern rough. Active fire behavior. Last report unless significant activity.

**Three Mile**, Florida Forest Service. Thirty-five miles west of Coral Springs, FL. Southern rough. Active fire behavior with flanking. Last report unless significant activity occurs.

**Echo Springs**, Merritt Island NWR. Ten miles east of Avon Park, FL. Southern rough. No new information.

**Predictive Services Discussion:** The low pressure system that brought significant precipitation to the Southeast will move northeast up the Atlantic seaboard bringing precipitation to the remainder of the eastern states. High pressure over the Great Plains will continue to produce warm and dry conditions though scattered storms will be possible across western Nebraska and South Dakota in the afternoon. Looking west, mostly cool and dry conditions will be present as a cold front slowly drifts south into Colorado. Breezy winds across southern New Mexico and Arizona could lead to pockets of critical fire weather conditions. In Alaska, a weakening cold front will move into the interior. Moisture and instability in the atmosphere should be significant enough to create scattered wet storms as the front passes.

<https://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## EXTREME FIRE BEHAVIOR 1

*Weather / Fire Behavior Category*

Mild, moderate and EXTREME fire behavior has always been present in cases of shelter deployment. It is critical for firefighters to maintain situational awareness of live and dead fuel moisture conditions as well as predicted and current weather conditions. As fire behavior changes, it is critical to act decisively to the changing situation.

Discuss the following indicators of extreme fire behavior:

- Relative humidity less than 15%
- 1-hour fuel moisture less than 5%
- Transition from surface to crown fire
- Smoldering fires that exist in the early part of the day are beginning to burn very actively as the day progresses.
- Approaching thunderheads with dark clouds beneath
- Presence of dust devils indicating an unstable atmosphere
- Increased spotting
- Sudden calm
- High clouds moving fast in direction different from surface wind
- Predicted Haines Index of 5 and 6 in those areas where this level is a good indicator of atmospheric instability
- Fire whirls
