

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, May 26th, 2017 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (90 new fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires:**	2
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	0

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southwest Area (PL 3)**

New fires:	13
New large incidents:	0
Uncontained large fires:	0
Type 1 IMTs Committed	1

**Pinal**, Tonto NF. IMT 1 (Day). Six miles south of Globe, AZ. Timber and chaparral. Active fire behavior with backing, and single tree torching. Numerous structures threatened. Road and area closures in effect.

**Snake Ridge**, Coconino NF. Thirty-four miles southeast of Flagstaff, AZ. Timber, brush and short grass. Moderate fire behavior with isolated torching. Last report unless significant activity occurs.

**Dove**, San Carlos Agency, BIA. Thirty miles northeast of San Carlos, AZ. Hardwood Litter and Short Grass. Moderate fire behavior. Last report unless significant activity occurs.

**Baca**, Gila National Forest, Forest Service. Twelve miles southwest of Quemado, NM. Short grass and timber. Moderate fire behavior with creeping. Trail closures in effect. Last report unless significant activity occurs.

**Predictive Services Discussion:** Dry conditions are expected across most of the eastern states as the previous day's system exits through New England by evening. Another, weaker cold front will move into the eastern plains bringing scattered storms. Cool conditions will continue across the intermountain west as another front moves southeast into the Great Basin. Warmer and drier conditions are expected along the West coast as a ridge of high pressure strengthens off shore. Scattered showers and thunderstorms will continue across Alaska as a broad upper level trough lingers over the state.

<https://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## BASE ALL ACTIONS ON CURRENT AND EXPECTED FIRE BEHAVIOR

*Weather / Fire Behavior Category*

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
  - Post lookouts.
  - Check communications.
  - Retreat if you have doubts about your escape routes or safety zones or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.

How would you judge the fire season? (Above normal, below, or average.)
