# National Interagency Coordination Center Incident Management Situation Report <br> Sunday, June 11th, 2017 - 0530 MT <br> National Preparedness Level 2 

## National Fire Activity

Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Light (67 new fires)
7

Area Command Teams Committed: 0
NIMOs committed:
0
Type 1 IMTs committed:
2
Type 2 IMTs committed:
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

## Southwest Area (PL 4)

New fires: 10
New large incidents: 4
Uncontained large fires: 8
Type 1 IMTs committed: 2
Type 2 IMTs committed: 3
Lizard, Coronado, NF. IMT 1 (Pierson). Three miles southeast of Dragoon, AZ. Short grass and brush. Active fire behavior with flanking, wind driven and uphill runs. Numerous residences threatened. Evacuations in effect.

* Highline, Tonto, NF. IMT1 (Day). Eight miles north of Payson, AZ. Timber, brush and tall grass. Extreme fire behavior with running, torching and spotting. Numerous residences threatened. Road and trail closures in effect.

Boundary, Coconino, NF. IMT 2 (Andrews). Twelve miles north of Bellemont, AZ. Timber, short grass, heavy logging slash. Moderate fire behavior with flanking and backing. Road, area and trail closures in effect.

Bowie, Southeast District, Arizona DOF. IMT 2 (Sinclair). Thirteen miles southeast of Bowie, AZ. Brush and tall grass. Minimal fire behavior with smoldering. Residences threatened.

Freeze 2, San Carlos Agency, BIA. IMT 2 (Bales). Twenty-seven miles southeast of Whitewater, AZ. Timber. Moderate fire behavior with isolated torching, backing and creeping.

Paige Creek, Coronado, NF. Seventeen miles northeast of Vail, AZ. Brush and short grass. Minimal fire behavior with creeping and smoldering. Residences threatened.

Slim, Apache-Sitgreaves NF. Sixteen miles west of Heber, AZ. Timber and closed timber litter. Minimal fire behavior with creeping. Road closures in effect. Reduction in acreage due to more accurate mapping.

* Rucker, Coronado, NF. Twenty-three miles northeast of Elfida, AZ. Brush and tall grass. Active fire behavior with flanking. Structures threatened.
* Saner, Coronado, NF. Twenty-one miles southeast of Elfrida, AZ. Brush and tall grass. Minimal fire behavior with creeping and smoldering.
* Frye, Coronado, NF. Nine miles west of Swift Trail Junction, AZ. Timber and brush. Moderate fire behavior with wind driven runs, flanking and creeping. Last report unless significant activity occurs.

* 1 Hectare = 2.47 Acres

Predictive Services Discussion: The Aleutian Low Pressure system will move onshore and into southwestern Alaska bringing cooler temperatures and spreading scattered showers across nearly the entire state south of the Brooks Range. The upper level low pressure system previously over the Pacific Northwest will move into the northern Great Basin and Northern Rockies bringing widespread moderate to heavy precipitation. Snow is possible across higher elevated portions of the Northern Rockies. Critical fire weather conditions will continue across southern portions of the Great Basin and Arizona as breezy southwesterly winds and low humidities continue across the region. While wet conditions continue along the Gulf Coast, the rest of the East will begin to heat up as the ridge of high pressure moves east of the Mississippi River.

# FREQUENT SPOT FIRES ACROSS THE LINE 

Weather / Fire Behavior Category

There are few watchout situations that state more clearly how much potential your fire has for rapid, uncontrolled growth. Consider the following questions if you are getting spot fires across your line:

- Can you handle increased spotting? List some ways you can keep ahead of spot fires (gridding the green, lookouts, etc.)
What is your probability of ignition doing? Is it increasing or decreasing?
- Do you have a plan for long-range spotting? In what fuel type and under what conditions will you likely have long-range spotting? What types of plans can you think of for handling long-range spotting?
- Is help available if necessary? What kinds of resources will you have in place or order to handle spot fires?
- If fire behavior increases, is your position still defensible? Discuss what type of action you might take if a spot fire takes off.
- Do you have more than one safety zone in case one gets cut off? Describe how you might have multiple safety zones.
- Do the primary lookouts have a good view of the situation? Discuss who might be acting as a lookout (e.g., crew member, air resources, etc.) and how you will get good information from that person. (Are you relying on an air attack that is busy with air tankers?)
- Where are you in the burning period? Talk about how your tactics may vary from finding spot fires early in the day to later into the evening. Review Probability of Ignition (PIG) and what it can tell you about spotting potential.
- To reduce the risk, be ready to retreat. Keep your guard up even if spotting has not occurred for a few hours. Review fires where you have had frequent spot fires and what you learned about controlling them.
