

**National Interagency Coordination Center
Incident Management Situation Report
Monday, June 12th, 2017 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (79 new fires)
New large incidents:	7
Large fires contained:	4
Uncontained large fires:**	14
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 5)

New fires:	16
New large incidents:	4
Uncontained large fires:	8
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

Highline, Tonto, NF. IMT1 (Day). Eight miles north of Payson, AZ. Timber, brush and tall grass. Active fire behavior with group torching, short range spotting and backing. Numerous residences threatened. Road and trail closures in effect.

Boundary, Coconino, NF. IMT 2 (Andrews). Twelve miles north of Bellemont, AZ. Timber, short grass, and heavy logging slash. Moderate fire behavior with torching, flanking and backing. Road, area and trail closures in effect.

Bowie, Southeast District, Arizona DOF. IMT 2 (Sinclair). Thirteen miles southeast of Bowie, AZ. Brush and tall grass. Minimal fire behavior with smoldering. Residences threatened.

Freeze 2, San Carlos Agency, BIA. IMT 2 (Bales). Twenty-seven miles southeast of Whitewater, AZ. Timber. Moderate fire behavior with smoldering, backing and creeping.

Lizard, Coronado, NF. IMT 1 (Pierson). Three miles southeast of Dagoon, AZ. Short grass and brush. No new information.

Rucker, Coronado, NF. Twenty-three miles northeast of Elfida, AZ. Brush, timber and tall grass. Active fire behavior with single tree torching, running and backing. Structures threatened.

Paige Creek, Coronado, NF. Seventeen miles northeast of Vail, AZ. Brush and short grass. Minimal fire behavior with smoldering.

Slim, Apache-Sitgreaves NF. Sixteen miles west of Heber, AZ. Timber and closed timber litter. Minimal fire behavior with creeping and smoldering. Road closures in effect.

* **Tee**, Central District, Arizona DOF. Four miles southeast of Canyon City, AZ. Tall grass and brush. Moderate fire behavior with running and spotting. Residences threatened. Road closures in effect.

* **Round**, Gila, NF. Sixteen miles west of Winston, NM. Timber and short grass. Active fire behavior with flanking, backing and creeping. Last report unless significant activity occurs.

* **Bonita**, Carson, NF. Sixteen miles northeast of Canjilon, NM. Timber, brush and short grass. Moderate fire behavior with single tree torching, flanking and creeping. Road and area closures in effect. Last report unless significant activity occurs.

* **Straw**, Gila, NF. Thirty-five miles northwest of Mimbres, NM. Timber. Minimal fire behavior with backing and creeping. Last report unless significant activity occurs.

Predictive Services Discussion: Scattered showers will continue across much of the southern half of Alaska as the low pressure system moves from the Alaskan Peninsula into the northern Gulf of Alaska. The northwestern portion of the Lower 48 will remain cool and wet as the abnormally strong system overhead begins to split into two systems. Areas along the Pacific Coast could see some warming and drying by afternoon as a weak ridge of high pressure begins to move onshore behind the departing system. The eastern half of the CONUS will remain hot and dry under a weakening ridge of high pressure except along the Gulf Coast where a weak low pressure system will move east along the northern coastline and enhancing the convective activity as far east as northern Florida.

COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES

Weather / Fire Behavior Category

Five common denominators that contribute to accidents/incidents have been identified through studies of tragedy fires. It is important for firefighters to readily recognize the following common denominators so that future tragedies can be prevented:

- Most incidents happen on smaller fires or on isolated portions of larger fires.
- Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in flare-ups or extreme fire behavior. In some cases, tragedies occur in the mop-up stage.
- Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
- Fires run uphill surprisingly fast in chimneys, saddles, gullies, and on steep slopes.
- Some suppression tools, such as helicopters or air tankers, can adversely affect fire behavior. The blasts of air from low-flying helicopters and air tankers have been known to cause flare-ups.
