

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, June 13th, 2017 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (121 new fires)
New large incidents:	6
Large fires contained:	3
Uncontained large fires:**	15
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southwest Area (PL 5)**

New fires:	8
New large incidents:	2
Uncontained large fires:	8
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

**Highline**, Tonto, NF. IMT1 (Day). Eight miles north of Payson, AZ. Timber, brush and tall grass. Active fire behavior with isolated torching, short range spotting and backing. Numerous residences threatened. Road and trail closures in effect.

**Lizard**, Coronado, NF. IMT 1 (Pierson). Three miles southeast of Dagoon, AZ. Short grass and brush. Moderate fire behavior with flanking and backing. Numerous residences threatened. Evacuations and area closures in effect.

**Boundary**, Coconino, NF. IMT 2 (Andrews). Twelve miles north of Bellemont, AZ. Timber, short grass and heavy logging slash. Moderate fire behavior with torching, flanking and backing. Road, area and trail closures in effect.

**Rucker**, Coronado, NF. IMT 2 (Sinclair). Twenty-three miles northeast of Elfida, AZ. Brush, timber and tall grass. Minimal fire behavior with creeping, backing and smoldering. Structures threatened.

**Freeze 2**, San Carlos Agency, BIA. IMT 2 (Bales). Twenty-seven miles southeast of Whitewater, AZ. Timber and short grass. Moderate fire behavior with smoldering, backing and creeping.

**Slim**, Apache-Sitgreaves NF. Sixteen miles west of Heber, AZ. Timber and closed timber litter. Minimal fire behavior with smoldering. Road closures in effect.

**Bowie**, Southeast District, Arizona DOF. Transfer of command from IMT 2 (Sinclair) back to local unit occurred yesterday. Thirteen miles southeast of Bowie, AZ. Brush and tall grass. Minimal fire behavior with smoldering. Residences threatened. Reduction in acreage due to more accurate mapping.

**Tee**, Central District, Arizona DOF. Four miles southeast of Canyon City, AZ. Tall grass and brush. Minimal fire behavior with smoldering. Residences threatened.

\* **Windyhill**, Tonto, NF. Three miles east of Roosevelt, AZ. Brush. Moderate fire behavior. Structures threatened.

\* **Gravel**, Gila, NF. Twenty-three miles southeast of Reserve, NM. Timber and short grass. Minimal fire behavior with creeping, backing and flanking. Last report unless significant activity occurs.

**Predictive Services Discussion:** Slight warming and drying will occur along the West Coast as the strong low pressure system begins to move east into eastern Montana and North Dakota by afternoon. Pockets of critical fire weather conditions are possible along the southern tier of the system near the Four Corners as breezy winds interact with low afternoon humidities. In Alaska, a weak ridge over the interior will produce a brief warming and drying trend, but a low pressure area is expected to develop along the Arctic Coast late in the day and will begin to move south overnight. Elsewhere across the country, very warm conditions are expected across the Great Plains and the East as high pressure lingers over the eastern half of the nation. Afternoon showers will continue to redevelop along the Gulf Coast and will spread east into Florida.

<https://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## ENTRAPMENT AVOIDANCE

*Operational Engagement Category*

Avoiding situations where firefighters become entrapped is the first concern when devising strategy and tactics. The following discussion points are among the things that should be considered.

- Discuss the three types of safety zones and describe examples.
  - The burn
  - Natural features
  - Constructed sites
- Discuss the guidelines for distance separation to avoid radiant heat injury.
  - Four times the maximum flame height (20 feet-flame height x 4 = 80 feet radius from firefighters)
  - Discuss size based on amount of resources and equipment in the area.
- Discuss heat impact factors that will affect the guidelines for distance separation.
  - Convection heat from wind and terrain features
  - Location relative to fire spread
  - Reburn potential of fuel in safety zone
- Discuss that firefighter's have a right to know the location of their escape routes and safety zones at all times.
- Discuss that firefighter have a right to ask for clarification when faced with unclear instructions or fear of the unknown.
- Describe a basic procedure for identification of effective escape routes and safety zones.
  - Observe
  - Visualize
  - Identify
  - Time
  - Inform
  - Evaluate

**Have an idea? Have feedback? Share it.**
