

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, June 19th, 2017 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (87) new fires
New large incidents:	3
Large fires contained:	1
Uncontained large fires:**	15
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

\*\*Uncontained large fires only include fires being managed under a full suppression strategy.

**Southwest Area (PL 5)**

New fires:	10
New large incidents:	2
Uncontained large fires:	9
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

**Frye**, Coronado, NF. IMT 2 (Sinclair). Nine miles west of Swift Trail Junction, AZ. Timber and brush. Extreme fire behavior with uphill runs, crowning and short crown runs. Numerous residences threatened. Road, area and trail closures in effect.

**Highline**, Tonto, NF. IMT 1 (Day). Eight miles north of Payson, AZ. Timber, brush and tall grass. Moderate fire behavior with flanking, short range spotting and creeping. Road, area and trail closures in effect.

**Boundary**, Coconino, NF. IMT 2 (Andrews). Twelve miles north of Bellemont, AZ. Timber, short grass and heavy logging slash. Moderate fire behavior with backing, flanking and torching. Residences threatened. Evacuations, road, area and trail closures in effect.

**Cajete**, Santa Fe, NF. IMT 1 (von Tillow). Eight miles northeast of Jemez Springs, NM. Timber and medium logging slash. Minimal fire behavior with smoldering and creeping. Structures threatened. Area closures in effect.

\* **Maggie**, Phoenix District Office, BLM. Six miles north of Black Canyon City, AZ. Tall grass, brush and timber. Moderate fire behavior. Residences threatened. Evacuations in effect.

\* **Encino**, Bernalillo District, New Mexico State Forestry. Thirteen miles northwest of Rio Rancho, NM. Brush and short grass. Active fire behavior with running, single tree torching and short range spotting. Structures threatened.

**Corral**, Gila, NF. Twenty-three miles northwest of Mimbres, NM. Tall grass and timber. Moderate fire behavior with creeping, backing and single tree torching. Last report unless significant activity occurs.

**Round**, Gila, NF. Previously reported incident. Sixteen miles west of Winston, NM. Timber and short grass. Active fire behavior with flanking, backing and torching. Last report unless significant activity occurs.

**R-14**, Fort Apache Agency, BIA. Three miles south of Cedar Creek, AZ. Timber. Minimal fire behavior with smoldering.

**Bonita**, Carson, NF. IMT 2 (Bales). Sixteen miles northeast of Canjilon, NM. Timber, brush and short grass. No new information.

**Lizard**, Coronado, NF. Three miles southeast of Dragoon, AZ. Short grass and brush. Last report unless new information is received.

**Freeze 2**, San Carlos Agency, BIA. Twenty-seven miles southeast of Whitewater, AZ. Timber and short grass. No new information.

**Flying R**, Coronado, NF. Nine miles southeast of Patagonia, AZ. Short grass and brush. Last report unless new information is received.

**Windyhill**, Tonto, NF. Three miles east of Roosevelt, AZ. Brush. Last report unless new information is received.

**Predictive Services Discussion:** Warm and mostly dry conditions are expected across the interior of Alaska as high pressure over the state strengthens. Scattered showers and storms will be focused mainly over the Brooks Range to the north and over the Alaska Range to the south. Across the CONUS, high pressure over the west will continue to strengthen leading to well above normal temperatures and very low afternoon humidities. Isolated dry and wet storms will be possible over the Four Corners Region and across the Great Basin in the afternoon. The Pacific Northwest will begin to see moisture from an advancing system by afternoon in Washington State. Wet conditions will continue along the East Coast as a frontal boundary remains stalled along the coast.

<https://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## THUNDERSTORM SAFETY

*Weather / Fire Behavior Category*

Thunderstorms cause significant hazards for wildland firefighters, including downbursts that can cause extreme fire behavior and lightning. When thunderstorm development is likely, lookouts should be posted and aware of signs of a developing storm. A sudden reversal in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature may note the mature stage of a storm. Heavy rain, hail and lightning occur only in the mature stage of a thunderstorm. During a storm, use the following guidelines:

- Do not lie down.
  - The best position is sitting on the pack or crouching with feet close together.
  - Avoid sitting directly on the ground, if possible; but, if necessary, keep feet and butt close together.
  - Avoid grouping together. Keep a minimum of 15 feet between people when possible.
  - Removing caulk boots will not provide safety if stocking covered or bare feet are then in contact with the ground--don't bother!
- "Stay out of dry creek beds" is correct for flash floods, but has nothing to do with lightning.
- Handheld radios (with short rubber antennas) or cell phones are safe to use. Communication is vital to crew safety. Do not use land line radios or radios with elevated antennas.
- Wide, open spaces are better than trees or clumps of trees in the vicinity. Ridge tops, etc., should be avoided.
- If you feel the hair on your arms or head "stand up," there is a high probability of a strike in the vicinity. Crouch or sit on a pack.
- Put down all tools.
- Take shelter in vehicles if possible.
