National Interagency Coordination Center
Incident Management Situation Report
Wednesday, June 28th, 2017 - 0530 MT
National Preparedness Level 2

## National Fire Activity

Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Light (186) new fires
20
11
Area Command Teams Committed: 1
NIMOs committed: 0
Type 1 IMTs committed:
Type 2 IMTs committed:
**Uncontained large fires only include fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

## Southwest Area (PL 4)

New fires: 14
New large incidents: 4
Uncontained large fires:
6
Area Command Teams committed:
1
Type 1 IMTs committed:
Area Command Team (Muir) has been assigned to the Coronado, NF for large fire support.
Goodwin, Prescott, NF. IMT 1 (Pierson). Eight miles southwest of Mayer, AZ. Chaparral and short grass.
Active fire behavior with uphill runs, short range spotting and crowning. Numerous residences threatened. Evacuations, road and area closures in effect.

Frye, Coronado, NF. IMT 1 (Poncin) Nine miles west of Swift Trail Junction, AZ. Timber, brush and chaparral. Moderate fire behavior with backing and flanking. Numerous residences threatened. Road, area and trail closures in effect.

* Fraguita, Coronado, NF. Four miles south of Arivaca, AZ. Tall grass and brush. Moderate fire behavior with backing and flanking.
* Tiffany, Southeast District, New Mexico State Forestry. Thirty miles south of Socorro, NM. Chaparral and hardwood litter. Extreme fire behavior with crowing and torching. Residence threatened.
* Mink, Coronado, NF. Three miles southwest of Arivaca, AZ. Tall grass and brush. Minimal fire behavior with creeping.

Boundary, Coconino, NF. Twelve miles north of Bellemont, AZ. Timber, short grass and heavy logging slash. Minimal fire behavior. Road, area and trail closures in effect. Last report unless significant activity occurs.

Cajete, Santa Fe, NF. Eight miles northeast of Jemez Springs, NM. Timber and medium logging slash. Minimal fire behavior with smoldering. Area closures in effect.

* Maynard, Southeast Area, Arizona DOF. Thirteen miles west of Amado, AZ. Short grass and brush. Minimal fire behavior. Last report unless significant activity occurs.

Bonita, Carson, NF. Sixteen miles northeast of Canjilon, NM. Timber, brush and short grass. Minimal fire behavior with smoldering. Road, area and trail closures in effect. No new information.

Predictive Services Discussion: A strong ridge of high pressure centered over the Yukon and Northwest Territories will keep eastern portions of the Alaskan interior warm and dry. There will be a slight chance for isolated thunderstorms along the North Slope and east of Fairbanks. Western portions of the state will be wet under the influence of a stalled frontal system. A broad trough over the Pacific Northwest through the Northern Great Plains will keep temperatures near normal across much of the west. Slightly breezy conditions are expected across the Great Basin and Central Rockies. Across the Southwest, monsoonal moisture will continue to ooze northward into New Mexico and southeastern Arizona and will lead to another round of scattered wet storms in the afternoon.

HAZARD TREE FELLING - HANG-UPS
Felling Safety Category

For decades, hazard trees have been associated with numerous deaths of workers assigned fire operations and project work. Incidents involving hazard trees are included in the top 5 life threats to wildland firefighters along with wildfire entrapment and motor vehicle accidents. In private industry, logging is recognized as the most dangerous occupation in the nation, and many associated fatalities involve felling hazard trees. Felling a hung-up hazard tree is a particularly hazardous and complex task.

Sawyers are to be reminded on how vital it is to constantly apply and maintain situational awareness and assess risks, particularly when faced with problem of a hang-up hazard tree.

In most cases, safely felling a hang-up requires extreme caution and expertise due to characteristic danger and complexity. The following are
 some topics experienced sawyers should review during 6 minutes for safety/tailgate safety discussions and cover in training modules specifically designed to address felling hang-up hazard trees:

- Cut/No Cut (walk-a-way) criteria
- Risk Assessment
- Situational Awareness Checklist
- Secure Felling Area
- No Work Zones (NWZ)
- Blasting option
- Equipment/cable option
- Role/responsibility of swamper/lookout
- Escape routes
- Pushing/driver tree opportunity
- Felling trees tied together
- Sidewinder potential
- Hazards of obscured view of top
- Need to keep looking up
- Weak/spiked tops, limb location/condition/density, and hidden defect/rot
- Prescribed step down (fence post/wafer) cutting techniques
- Rope Technique
