# National Interagency Coordination Center <br> Incident Management Situation Report <br> Friday, June 30th, 2017 - 0530 MT <br> National Preparedness Level 3 

## National Fire Activity

Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Light (136) new fires
10
5

Area Command Teams Committed
NIMOs committed: 0
Type 1 IMTs committed:
3
Type 2 IMTs committed:
**Uncontained large fires only include fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

## Southwest Area (PL 4)

New fires: 13
New large incidents:
3
Uncontained large fires: 11
Area Command Teams committed: 1
Type 1 IMTs committed:
Area Command Team (Muir) has been assigned to Southwest Regional Support in Phoenix, AZ for large fire support.

Goodwin, Prescott, NF. IMT 1 (Pierson). Eight miles southwest of Mayer, AZ. Chaparral and short grass. Active fire behavior with uphill runs, flanking and spotting. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

Frye, Coronado, NF. IMT 1 (Poncin) Nine miles west of Swift Trail Junction, AZ. Timber, brush and chaparral. Active fire behavior with running and flanking. Residences threatened. Road, area and trail closures in effect.

Tiffany, Southeast District, New Mexico State Forestry. Thirty miles south of Socorro, NM. Chaparral and hardwood litter. Extreme fire behavior with crowing, group torching and short range spotting. Residences threatened.

Swisshelms, Southeast Area, Arizona DOF. Ten miles east of Elfrida, AZ. Tall grass, brush and short grass. Active fire behavior with running and spotting. Residences threatened.

* Gentry, Apache-Sitgreaves, NF. Ten miles southwest of Heber, AZ. Heavy logging slash and tall grass. Active fire behavior with short range spotting and isolated torching. Road and area closures in effect.

Bonita, Carson, NF. Sixteen miles northeast of Canjilon, NM. Timber, brush and short grass. Minimal fire behavior. Road, area and trail closures in effect.

Fraguita, Coronado, NF. Four miles south of Arivaca, AZ. Tall grass and brush. Minimal fire behavior with creeping and smoldering. Residences threatened.

* Gremlin, Northwest District, Arizona DOF. Twenty-five miles northeast of Kingman, AZ. Tall grass, brush and short grass. Active fire behavior with running and torching. Residences threatened. Evacuations and road closures in effect.

Mink, Coronado, NF. Three miles southwest of Arivaca, AZ. Tall grass and brush. Minimal fire behavior with smoldering and creeping.

Bell, Santa Fe, NF. Twelve miles south of Mosquero, NM. Timber, chaparral and tall grass. Moderate fire behavior with single tree torching, flanking and creeping. Reduction in acreage due to more accurate mapping.

* Whitman, Carson, NF. Eighteen miles northeast of Red River, NM. Timber. Active fire behavior with flanking and isolated torching.

Cajete, Santa Fe, NF. Eight miles northeast of Jemez Springs, NM. Timber and medium logging slash. No new information. Last report unless new information is received.

Predictive Services Discussion: High pressure along the Pacific Coast will migrate inland to allow for warming temperatures and low relative humidities across the Inland West as coastal areas cool slightly. Convective activity will linger along the Rocky Mountain Front as a back door front remains stalled over the central Great Plains and along the Continental Divide. Breezy conditions are expected across the remainder of the Great Plains and across the Great Lakes and Northeast regions. Wet conditions will continue across the Deep South along a stalled cold front. In Alaska, the ridge of high pressure over the Yukon and Northwest Territories will keep the interior mostly warm and dry with isolated storms developing during the afternoon period as far north as the Brooks Range. Coastal areas will remain wet and cool under the influence of a low pressure area that is positioned over the Gulf of Alaska.

## Wildland Firefighter

 Week of Remembrance June 30-July 6
"One of the few acts of free will that tragedy leaves within our control, is the chance to grow. Our brothers have given us such a precious and hard-won opportunity to learn new knowledge and apply lessons."
"Honor the Fallen" Member

June 30 through July 6 has been designated the NWCG "Wildland Firefighter Week of Remembrance." This week serves as an annual opportunity to renew our commitment to the safety of wildland firefighters as we remember those who have fallen in the line of duty. Over many decades, lessons learned from accidents and fatalities that have occurred on wildland fires have led to significant improvements in firefighter education, training, operational practices, and risk management processes. Unfortunately, wildland firefighting remains inherently hazardous, and we continue to experience accidents and fatalities. This "Week of Remembrance" is an opportunity to collectively remember our fallen firefighters as we continue our ongoing effort to enhance the safety of all wildland firefighters.

## Background:

In 2013 the wildland fire community suffered 34 fatalities over the course of the fire season including the tragic events on June $30^{\text {th }}$ on the Yarnell Hill Fire where 19 members of the Granite Mountain Hotshots lost their lives. That summer it seemed like there was one fatality after another. Each loss affected our lives. However, the loss of 19 members of Granite Mountain felt like it shook the community to our very core.

A small group comprised of Senior Leaders in Fire Management, Superintendents, Fire Management Officers, Scientists and Experts in Human Factors connected in a grassroots movement to understand the events of June $30^{\text {th }}$ and beyond. This group's single motivation was to honor our fallen brothers and sisters by learning as much as we could. The group eventually became known as "Honor the Fallen" (HTF).

## The Call to Action:

The mission of this group was not to judge or assign blame, but to engage in a sense-making journey, trying to understand the conditions, cultural practices, mental models, and examining our own vulnerabilities. The HTF group began several initiatives to engage the field at various levels to facilitate discussions around Yarnell as a springboard to stimulate dialog and influence change. The group facilitated preseason discussions at the national, regional, and local levels the following year. They utilized social media to reach larger audiences through Blogs, articles, and white papers.
What the Core Group Learned: Reflection is one of the biggest lessons we learned. Much like your own reflection in the mirror that greets you every morning, we kept having to return to look at ourselves. To see both the good and the bad. As we sought to understand, we had to first acknowledge a reflection of our own actions, beliefs, and long-held views in what we saw.
What We are Asking You To Do:
© Join us in a period of remembrance and take the time to reflect on your own actions, beliefs, and views of fire. Do you see what you want to see?

- If you could speak to the fallen, what would you say? How would you acknowledge their sacrifice? What has changed for you? How are you leading others to do the same?
- What is your ultimate responsibility as a leader?
- What does "Honor the Fallen" mean to you?
