Southwest Area (PL 4)

New fires:	9
New large incidents:	3
Uncontained large fires:	12
Area Command Teams committed:	1
Type 1 IMTs committed:	2

Area Command Team (Muir) has been assigned to Southwest Regional Support in Phoenix, AZ for large fire support.

Goodwin, Prescott, NF. IMT 1 (Pierson). Eight miles southwest of Mayer, AZ. Chaparral and short grass. Active fire behavior with spotting, flanking and backing. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

Frye, Coronado, NF. IMT 1 (Poncin) Nine miles west of Swift Trail Junction, AZ. Timber, brush and chaparral. Active fire behavior with running, flanking and backing. Residences threatened. Road, area and trail closures in effect.

Tiffany, Southeast District, New Mexico State Forestry. Thirty miles south of Socorro, NM. Chaparral and hardwood litter. Extreme fire behavior with crowning, group torching and short range spotting. Residences threatened.

* **Hilltop**, San Carlos Agency, BIA. Twenty-four miles west of Whiteriver, AZ. Timber, short grass and light logging slash. Active fire behavior with wind driven runs and short range spotting. Road closures in effect.

Swisshelms, Southeast Area, Arizona DOF. Ten miles east of Elfrida, AZ. Tall grass, brush and short grass. Active fire behavior with torching. Structures threatened.

Gentry, Apache-Sitgreaves, NF. Ten miles southwest of Heber, AZ. Heavy logging slash and tall grass. Moderate fire behavior with backing, flanking and single tree torching. Area and road closures in effect.

Fraguita, Coronado, NF. Four miles south of Arivaca, AZ. Tall grass and brush. Minimal fire behavior with smoldering. Residences threatened.

Gremlin, Northwest District, Arizona DOF. Twenty-five miles northeast of Kingman, AZ. Tall grass, brush and short grass. Minimal fire behavior with creeping and smoldering. Residences threatened.

* **Saddle**, Coronado, NF. Twenty miles north of Douglas, AZ. Short grass and brush. Minimal fire behavior with smoldering.

Mink, Coronado, NF. Three miles southwest of Arivaca, AZ. Tall grass and brush. Minimal fire behavior with smoldering.

Bell, Santa Fe, NF. Twelve miles south of Mosquero, NM. Timber, chaparral and tall grass. Minimal fire behavior with creeping and backing.

Whitman, Carson, NF. Eighteen miles northeast of Red River, NM. Timber. Minimal fire behavior with creeping, isolated torching and smoldering.

* **Gimme**, San Carlos Agency, BIA. Twenty miles northeast of San Carlos, AZ. Timber and light logging slash. Moderate fire behavior with smoldering. Last report unless significant activity occurs.

Bonita, Carson, NF. Sixteen miles northeast of Canjilon, NM. Timber, brush and short grass. No new information.

Predictive Services Discussion: A southward moving disturbance along the California Coast will produce isolated dry storms in the northern Sierra Mountains. Further inland, high pressure will continue to produce hot and dry conditions across the Southwest, Great Basin and the western half of the Northern Rockies. East of the Continental Divide, a stalled front will allow for scattered wet thunderstorms to continue. Some of those storms could develop just west of the divide and produce lightning across the mountains of Central Idaho. The Great Plains will remain relatively cool and breezy under a northwesterly flow while the East Coast will remain wet. In Alaska, the ridge of high pressure over the Yukon and Northwest Territories will keep the interior mostly warm and dry with isolated storms developing during the afternoon period as far north as the Brooks Range. Coastal areas will remain wet and cool under the influence of a low pressure area that is positioned over the Gulf of Alaska.

Week of Remembrance June 30-July 6

Day 2 **Getting Real About Leadership**

We all lead on the fireline, whether we are conscious of it or not. Decisions are rarely made in a vacuum. We all contribute to how

decisions get made. One of the most important decisions made regarding wildland fire is whether or not we "engage." How is this decision really made?

Look at pages 1 and 2 in the IRPG—they are intended to aid us with this crucial decision:

Wildland

Fire

Previous Fire Behavior Weather Forecast ☐ Local Factors

Consider risk versus gain

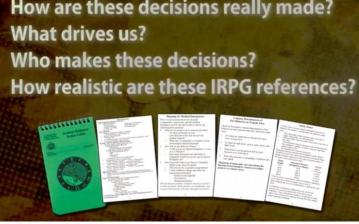

ent Controls

Scout the Fire ss Hazards Estimate Potential Fire Behavior Hazards Stimate Potential Fire Behavior Hazards Clook Up/Down/Around Indicators Identify Tactical Hazards Watch Outs As conditions change, what other safety hazards are likely to exist? Consider probability versus severity? Hop Controls and Make Risk Decisions Develop control measures that reduce risk: Firefighting Orders > LCES Anchor Point Downhill Checklist (if applicable) What other controls are necessary? Engineering/Administrative PPE Educational Avoidance Emergency Medevac Procedures/Plan Are controls in place to mitigate risk? NO - Reassess situation YES - Next question Are selected tactics based on expected fire behavior? NO - Reassess situation Have instructions been given and understood? NO - Reassess situation Consider risk versus gain

Discuss the following questions:

Ensure controls are in place and being implemented by personnel Ensure controls are integrated operational plan and understood at How are these decisions really made?

Planning for Medical Emergencies

Prior to each operational period, Incident Commanders, supervisors, and all wildland firefighters need to ask and be able to answer the following three questions:

- 1. What are we going to do if someone gets hurt?
 - Are there personnel on your crew/division/or fire that can provide medical support?
 - What type of equipment is available to treat and transport injured personnel?
- How will we get them out of here?
 - Could you get an injured firefighter to a road or to a Helispot?
 - How many personnel and what kind of equipment would you need to get an injured firefighter out?
- 3. How long will it take to get them to a hospital?
 - Where is the closest hospital? Will you use air or ground transportation? Could conditions change and affect the transportation timeline?
 - Smoke/clouds/nightfall
 - Fire behavior
 - Mechanical failures

rational activities should be based on answers questions. If the answers are insufficient, stop, and consider alternate strategies and tactics.
