## Southwest Area (PL 4)

New fires:
New large incidents:1

Uncontained large fires: 9
Area Command Teams committed: 1
Type 1 IMTs committed: 3

Area Command Team (Muir) has been assigned to Southwest Regional Support in Phoenix, AZ for large fire support.

Frye, Coronado, NF. IMT 1 (Poncin) Nine miles west of Swift Trail Junction, AZ. Timber, brush and chaparral. Extreme fire behavior with group torching and spotting. Residences threatened. Road, area and trail closures in effect.

Goodwin, Prescott, NF. IMT 1 (Pierson). Eight miles southwest of Mayer, AZ. Chaparral and short grass. Moderate fire behavior with single tree torching, flanking and backing. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

* Burro, Coronado, NF. IMT 1 (Day). Eight miles northeast of Tucson, AZ. Tall grass, brush and short grass. Active fire behavior with running, backing and spotting. Numerous residences threatened.

Tiffany, Southeast District, New Mexico State Forestry. Thirty miles south of Socorro, NM. Chaparral and hardwood litter. Active fire behavior with group torching, single tree torching and short range spotting. Structures threatened.

Hilltop, San Carlos Agency, BIA. Twenty-four miles west of Whiteriver, AZ. Timber, short grass and light logging slash. Active fire behavior with wind driven runs and short range spotting. Road closures in effect.

Swisshelms, Southeast Area, Arizona DOF. Ten miles east of Elfrida, AZ. Tall grass, brush and short grass.
Active fire behavior with wind driven runs, backing and flanking. Residences threatened.
Gentry, Apache-Sitgreaves, NF. Ten miles southwest of Heber, AZ. Heavy logging slash and tall grass. Moderate fire behavior. Road and area closures in effect.

Saddle, Coronado, NF. Twenty miles north of Douglas, AZ. Short grass and brush. No new information.
Whitman, Carson, NF. Eighteen miles northeast of Red River, NM. Timber. No new information.
Bonita, Carson, NF. Sixteen miles northeast of Canjilon, NM. Timber, brush and short grass. No new information. Last report unless new information is received.

* 1 Hectare $=2.47$ Acres

Predictive Services Discussion: The disturbance moving southward along the California Coast will move far enough south into California to pull up a surge of monsoonal moisture into Arizona and New Mexico. The widely scattered storms across the southern portions of both states will be wet, while storms up near Grand Canyon will be on the dry side. Isolated wet and dry storms will also continue to be possible across northeastern Idaho, northern Wyoming and a bigger cluster of wet storms possible across the northern Great Plains. The Northeast will remain breezy and dry while the Southeast remains wet with scattered, very wet storms. In Alaska, high pressure will migrate west along the Arctic Coast and will keep the northeastern interior warm and dry across the Upper Yukon Basin. Isolated storms will be possible along the southern fringe of the region in the afternoon.

# Week of Remembrance June 30-July 6 <br> Day 3 <br> Getting Real About Expected Fire Behavior <br> Fire Order \#3: 

Base all actions on current and expected behavior of the fire.

- Has a fire ever done something you didn't expect it to do? It happens often.

On the Nuttall Fire in 2004 an entire Division was surprised by a downhill crown run which put fire below them.

## Not one person on this piece of line or even the fire EXPECTED a downhill crown run.

## Discuss the following questions:

Want context from a real-life event? Watch and discuss Episode 2 of the Nuttall Fire Story video series here: https://youtu.be/TOEoopaWPQg

How can you plan for Unexpected fire behavior?
