

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, July 4, 2017 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

Initial attack activity:	Light (180) new fires
New large incidents:	12
Large fires contained:	1
Uncontained large fires:**	27
Area Command Teams Committed:	1
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	3

\*\*Uncontained large fires only include fires being managed under a full suppression strategy.

**Southwest Area (PL 4)**

New fires:	14
New large incidents:	0
Uncontained large fires:	7
Area Command Teams committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	1

Area Command Team (Muir) has been assigned to Southwest Regional Support in Tucson, AZ for large fire support.

**Burro**, Coronado NF. IMT 1 (Day). Eight miles northeast of Tucson, AZ. Timber, brush, and tall grass. Active fire behavior with single tree torching and backing. Numerous residences threatened. Evacuations, road and area closures in effect.

**Hilltop**, San Carlos Agency, BIA. IMT 2 (Bales). Twenty-four miles west of Whiteriver, AZ. Timber, short grass and light logging slash. Active fire behavior with wind driven runs, group torching and short-range spotting. Road closures in effect.

**Frye**, Coronado NF. IMT 1 (Poncin). Nine miles west of Swift Trail Junction, AZ. Timber, brush and chaparral. Moderate fire behavior with isolated torching and backing. Residences threatened. Road, area and trail closures in effect.

**Tiffany**, Southeast District, New Mexico State Forestry. Thirty miles south of Socorro, NM. Chaparral and hardwood litter. Moderate fire behavior with group torching, single tree torching and short-range spotting. Structures threatened.

**Swisshelms**, Southeast Area, Arizona DOF. Ten miles east of Elfrida, AZ. Tall grass, brush and short grass. Moderate fire behavior with wind driven runs and creeping. Residences threatened. Precipitation occurred over the fire area yesterday.

**Goodwin**, Prescott NF. Transfer of command from IMT 1 (Pierson) back to the local unit will occur tomorrow. Eight miles southwest of Mayer, AZ. Chaparral and short grass. Moderate fire behavior with flanking and backing. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

**Gentry**, Apache-Sitgreaves NF. Ten miles southwest of Heber, AZ. Timber, brush, and tall grass. Minimal fire behavior with creeping and smoldering. Road and area closures in effect.

**Saddle**, Coronado NF. Twenty miles north of Douglas, AZ. Short grass and brush. Minimal fire behavior.

**Predictive Services Discussion:** High pressure over the Southwest will gain strength and expand into the Great Basin and Northern Rockies. Isolated dry and a few wet storms will be possible along the Continental Divide and across the northern Great Basin and Northern Rockies regions in the afternoon. While winds will be generally light across the West, afternoon humidities will be quite low. Looking north to Alaska, warm and continued dry conditions are expected again across the interior. Convective activity should be more isolated than previous days and limited mainly to the Brooks and Alaska Ranges.

<https://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Week of Remembrance June 30-July 6

## Day 5

# Getting Real About Escape Routes

We always have pre-planned escape routes—right? Sometimes they become “absent, inadequate, or compromised.” That is called “an entrapment.” Here’s the definition from the NWCG glossary:

## Entrapment

- A situation where personnel are unexpectedly caught in a fire behavior-related, life-threatening position where planned escape routes or safety zones are absent, inadequate, or compromised. An entrapment may or may not include deployment of a fire shelter for its intended purpose. These situations may or may not result in injury. They include “near misses.”

So what if you are burning and your plan is to “bring the black with you”...

- But a surprise downhill crown run puts fire below you.

Your planned escape route was back up the line to the top...

- But some unexpected folks show up who are not capable of the fast hike out.

Now the plan is to bring everyone to the helispot—the best available refuge area...

- But the group hiking to the helispot are cut off by fire...

Now the group turns around and heads back up the line toward the top...

- On the way up, a crewmember becomes unconscious.

Each of those changes in the plan can be viewed as a “Red X” on

~~The Plan~~

Just in relation to  
Escape Routes –  
Discuss This  
Question:
