## Great Basin Area (PL 4)

| New fires: | 17 |
| :--- | :---: |
| New large incidents: | 2 |
| Uncontained large fires: | 11 |
| Type 2 IMTs committed | 5 |

Long Valley, Northern California District, BLM. IMT 2 (Fogle). Fifty miles north of Reno, NV. Brush and short grass. Extreme fire behavior with running, short-range spotting and uphill runs. Numerous residences threatened. Evacuations area and trail closures in effect. Energy infrastructure threatened. Sage-grouse habitat threatened.

Draw, Carson City District, BLM. IMT 2 (Rohrer). Fifty miles east of Fallon, NV. Closed timber litter, brush and short grass. Active fire behavior with running, spotting and torching. Structures threatened. Evacuations and road closures in effect. Energy infrastructure threatened. Sage-grouse habitat threatened.

Roosters Comb, Northern Region, Nevada DOF. IMT 2 (Goff). Twenty-five miles north of Battle Mountain, NV. Brush and tall grass. Active fire behavior with uphill runs and backing. Structures threatened. Road closures in effect. Sage-grouse habitat threatened.

Farad, Humboldt-Toiyabe NF. IMT 2 (Chadwick).Ten miles northeast of Truckee, Ca. Timber. Minimal fire behavior with single tree torching, creeping and short-range spotting. Structures threatened.

Brianhead, Southwest Area, Utah DOF. IMT 2 (DeMasters). One mile north of Brian Head, UT. Timber and hardwood litter. Minimal fire behavior. Road, area and trail closures in effect. Sage-grouse habitat threatened.

Tabor Flats, Northern Region, Nevada DOF. Sixteen miles west of Wells, NV. Brush and tall grass. Minimal fire behavior. Residences threatened.

* Birch Creek, Cassia County. Seven miles south of Oakley, ID. Brush and short grass. Active fire behavior with running and torching. Sage-grouse habitat threatened.

Potosi, Humboldt-Toiyabe NF. Twenty-eight miles southwest of Las Vegas, NV. Brush, tall grass and timber. Minimal fire behavior. Structures threatened.

Tweeds South, Arizona Strip Field Office, BLM. Nineteen miles southeast of Mesquite, NV. Short grass. Minimal fire behavior.

* West Sand, Richfield Field Office, BLM. Fifteen miles northeast of Delta, UT. Brush and tall grass. Active fire behavior with running.

Meadow Creek, Twin Falls District, BLM. Eight miles east of Sublet, ID. Hardwood litter, brush and short grass. Minimal fire behavior. Sage-grouse habitat threatened. Reduction in acreage due to more accurate mapping.

## Southern Area (PL 1)

New fires:
New large incidents: 23

Uncontained large fires:
Rivers Edge, Merritt Island National Wildlife Refuge, FWS. Five miles east of Titusville, FL. Southern Rough and tall grass. No new information. Last report unless new information is received.

Predictive Services Discussion: Hot conditions will return to the West as the Four Corner's high pressure ridge re-strengthens over the region. Scattered wet and dry storms will be possible across the Southwest and across the Great Basin in the afternoon. Humidities across the Southwest and the southern Great Basin will remain elevated. Isolated dry storms are expected across the Northern Rockies and the Pacific Northwest. A stalled cold front will bring scattered showers and storms to the central Plains through the Mid-Atlantic States. Hot and humid conditions are expected across the Southeast as the Bermuda High stretches west from the Atlantic Ocean into Alabama. In Alaska, isolated storms will be possible as a weak disturbance moves east overtop the established ridge of high pressure across the northern interior.

# MEDICAL INCIDENT REPORT 

Fire Communication Category

The new Medical Incident Report (MIR) form can be found at all of the following: pages 108-09 of the IRPG, Medical Plan ICS-206 WF form and in many Incident Action Plans (IAPs). The MIR evolved from, and has replaced, the " 9 Line Form" and "Pink Sticker.

The MIR is not always tasked to the EMT or Paramedic in "Patient Care". The intent of the form is to:

1) establish control of the incident whether routine or life-threatening by initiating a new Incident Command System,
2) have a systematic standard process for reporting medical incidents/injuries, similar to a fire size-up form for initial attack, and
3) have any firefighter be able to fill it out and transmit with prior training and direction.

- Treat it like any incident. If the incident is overwhelming, ask for a more qualified IC to assume command and expand/contract the organization's size depending on the needs of the incident.
- Fill this form out completely prior to transmitting the report to dispatch/communications. If there is a life threat, do not let documentation delay patient care.
- When transmitting the report, state the number and title of each section and say "break" and pause between the sections (e.g., "Dispatch, TFLD Jones, Stand by for Priority Medical Incident Report. All other radio traffic please hold BREAK (pause/wait for response.) 2. Incident Status: Nature of Illness is chest pain. Incident Name is Tank Medical. IC will be TFLD Jones. Patient Care will be Paramedic Smith. BREAK. 3. Initial Patient Assessment is...').
- When using the MIR during a Multi-Casualty Incident (MCI) state the number injured and their severity (Section 3), (e.g., "3. Initial Patient Assessment, I have 5 patients. 3 Reds, 1 Yellow and 1 Green. Mechanism of Injury is...").
- Use the terms Paramedic or EMT with the provider's last name in "Patient Care." Do not use EMT to describe a Paramedic or the ambiguous term, "Medic." All those roles need to be clearly identified to understand the level of care and treatment the patient(s) will receive.
- Enact more than one transport plan and clear more than one frequency if needed for Sections 5 and 6.
- Always be ready for the first plan to fail and be flexible enough to move into an alternate plan. Use the acronym PACE (Primary, Alternate, Contingency, and Emergency) for planning purposes.

## Action Items:

- Consider developing medical emergency tabletop scenarios as part of morning briefings or field scenarios on project work to be become familiar with the process. The more comfortable with the MIR you are, the more it will be second nature under stress.
- Ensure dispatchers and radio operators are aware of their roles and responsibilities pertaining to the Medical Incident Report.
- Review your local units' Emergency Plans.

Additional Resources: NWCG Incident Emergency Medical Subcommittee (IEMS)
This topic was submitted by AFMO Miles Ellis and Asst. State FMO Paul Hohn with Wyoming BLM and expanded upon by Grand Canyon Helitack's Eric Graff.
