

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, July 17, 2017 – 0530 MT  
National Preparedness Level 4**

**National Fire Activity**

Initial activity:	Light (176) new fires
New large incidents:	10
Large fires contained:	9
Uncontained large fires:**	35
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	5
Type 2 IMTs committed:	12

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Great Basin Area (PL 4)**

New fires:	17
New large incidents:	3
Uncontained large fires:	7
Type 2 IMTs committed	5

**Long Valley**, Northern California District, BLM. IMT 2 (Fogle). Fifty miles north of Reno, NV. Brush and short grass. Active fire behavior with uphill runs, wind driven runs and short-range spotting. Numerous residences threatened. Evacuations, area and trail closures in effect. Energy infrastructure threatened. Sage-grouse habitat threatened.

**MM155**, Winnemucca District, BLM. Twenty-one miles southwest of Winnemucca, NV. Brush and short grass. Active fire behavior with running. Numerous structures threatened. Evacuations in effect. Sage-grouse habitat threatened.

\* **Four Seasons Complex** (2 fires), Elko District, BLM. Includes previously reported Snowstorm and Cornucopia incidents. IMT 2 (Goff). IMT is also managing Roosters Comb incident. Started on state land 50 miles north of Battle Mountain, NV. Brush and tall grass. Active fire behavior with flanking and running. Structures threatened. Sage-grouse habitat threatened.

**Roosters Comb**, Northern Region, Nevada DOF. Twenty-five miles north of Battle Mountain, NV. Brush and tall grass. Minimal fire behavior. Sage-grouse habitat threatened.

\* **Missouri**, Payette NF. IMT 2 (Roide). One miles southwest of Yellow Pine, ID. Timber and brush. Active fire behavior with uphill runs and torching. Structures threatened. Trail closures in effect.

\* **Water Tower**, Uinta/Wasatch-Cache NF. One mile east of Alpine, UT. Timber and brush. Active fire behavior with uphill runs, backing and group torching. Residences threatened. Evacuations in effect.

**Bravo17**, Fallon Naval Air Station, DOD. IMT 2 (Rohrer). Started on BLM land 25 miles east of Fallon, NV. Closed timber litter, brush and short grass. Minimal fire behavior with creeping and smoldering. Reduction in acreage due to more accurate mapping.

**Brianhead**, Southwest Area, Utah DOF. Transfer of command from IMT 2 (DeMasters) back to the local unit will occur today. One mile north of Brian Head, UT. Timber and hardwood litter. Minimal fire behavior. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Predictive Services Discussion:** The strong, hot thermal ridge of high pressure will begin its eastward trek toward the Great Plains as a cold front begins to move into the Pacific Northwest. Scattered storms will be possible across the Interior West as monsoonal flow works its way north along the backside of the ridge. Breezy winds across the Columbia Basin could create pockets of critical fire weather conditions. The Northeast will remain dry and warm while the Southeast remains wet beneath a stalled cold front that is draped across the Gulf Coast. In Alaska Warm and dry conditions are expected as a weakening high pressure remains anchored over the interior.

**This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?**

## Battlement Creek Fire, Colorado – July 17<sup>th</sup>, 1976

**Incident Summary:** It's 1976 and western Colorado is experiencing an unusually severe fire season caused partly by unusual fuel conditions and heavy lightning activity during dry weather. A severe frost in June kills a high percentage of the leaves on Gambel oak which remain on the branches and is considered one of Colorado's most flammable fuels. 10 hour fuels are at 3-5%. A large scale high pressure weather pattern sits over western Colorado allowing for local weather to be influenced by terrain and diurnal winds averaging 10-15 mph in the afternoon with higher gusts. The weather is fair and hot with the temperatures at Grand Junction and Rifle reaching into the mid and upper 90's. A fire is reported 40 miles northeast of Grand Junction, in the Battlement Creek drainage. The fire is burning over an elevation range of 6200-8400 ft on a steep west-facing slope.

Friday July 16, 0630, two hotshot crews from the Coconino NF Arizona arrive at the Battlement Creek fire. This is the seventeenth fire of the first season for the newly formed Mormon Lake Hotshot Crew. The strategy is to prevent western and southern spread. The crews begin a major burnout of the catline (dozer line) from the rocky bluffs (Point A) at about 1615, downhill along the catline toward the Battlement Creek road at the bottom (Point C) ending about 2030. The fire makes an uphill run in oak brush burning out a large portion of the drainage (from the road east to the ridgetop) in about 20 minutes. Two "impressive" fire whirls are observed between 1600-1700. The night shift continues the burn out (Point C-D and beyond along the road) but is spotty with considerable unburned fuel remaining. Other night shift crews construct line along the ridgetop (Point E to G). Based on Friday's fire behavior, the E-G line is a crucial spot on the fire. Saturday July 17<sup>th</sup>, 0700, at morning briefing the Mormon Lake crew is assigned to burn out this section of line.

**Saturday morning, July 17<sup>th</sup>** - Due to a delay with the helicopter, the Mormon Lake crew does not get to the base of the rock bluff (Point E) until 1100. They are instructed to improve and burn out the line from the rocky bluff to the helispot (Point E-G). The burnout squad consisted of the crew boss, squad boss and 2 crewmembers. The rest of the crew is improving the handline down the ridgetop.

At this same time another crew is burning out in the bottom of the draw (Point C-D). The draw burns readily, uphill toward the ridge and the Mormon Lake crew. Neither crew knew of the specific location or assignment of the other.

**1400** - 1/3 the way from the rock bluff to the upper helispot, there is a noticeable increase in smoke from the draw below (where the other crew had been burning). The crew boss is instructed to speed up the line improvement squad on toward the safety zone (Point G) and to narrow down and speed up his burnout on down the ridgeline to join the remainder of the crew in the safety zone when his burnout was done. Upslope winds have increased to 25-35 mph.

**1425-1440** - The line improvement squad just makes it into the safety zone when the flame front hits the ridge. 200 yards back, the burnout squad radios that they are "trapped". Their escape is blocked by heavy smoke and flames.

**1440 - 1445** - The squad removes their canvas vests to cover their head and face, moistened the vests and their clothes with water from their canteens, and lays face down in the mineral soil of the fireline.

**1448 - All four firefighters are very badly burned. Three will lose their lives.**

### Discussion Points

The day prior to the burnover, an airtanker crashed during a retardant dropping mission on the Battlement Creek fire killing the pilot.

[Battlement Creek Fire Investigation Report](#)

- ✓ Discuss how incidents and distractions can affect our judgment and situational awareness.

The crew all wore aluminum hardhats, canvas vests, Nomex shirts and non-fire-resistant work pants. Fire shelters were not used. Fire shelters may have prevented serious burns and death at this incident. Policy on issuing and carrying shelters had not been established yet. This incident became the catalyst for the mandatory use of fire shelters and fire resistant clothing.

- ✓ **Take this opportunity to inspect, repair or replace your PPE and fire shelter if needed to ensure that it protects you as well as possible.**

**Have an idea? Have feedback? Share it.**
