# National Interagency Coordination Center Incident Management Situation Report <br> Tuesday, July 18, 2017 - 0530 MT <br> National Preparedness Level 4 

National Fire Activity
Initial activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Area Command Teams Committed:
Light (179) new fires

NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
**Uncontained large fires include only fires being managed under a full suppression strategy. Link to Geographic Area daily reports.

| Active Incident Resource Summary |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| GACC | Fires | Cumulative Acres | Crews | Engines | Helicopters | Total Personnel |

## Great Basin Area (PL 4)

| New fires: | 35 |
| :--- | :---: |
| New large incidents: | 5 |
| Uncontained large fires: | 10 |
| Type 2 IMTs committed | 4 |

Long Valley, Northern California District, BLM. IMT 2 (Fogle). Fifty miles north of Reno, NV. Brush and short grass. Active fire behavior with wind-driven runs and short-range spotting. Numerous residences threatened. Area and trail closures in effect. Energy infrastructure threatened. Sage-grouse habitat threatened.

[^0]* Grass Valley, Winnemucca District, BLM. Sixteen miles south of Winnemucca, NV. Brush and short grass. Active fire behavior with running and short-range spotting. Structures threatened. Sage-grouse habitat threatened.

Missouri, Payette NF. IMT 2 (Roide). One miles southwest of Yellow Pine, ID. Timber and brush. Active fire behavior with uphill runs and torching. Structures threatened. Area and trail closures in effect. Reduction in acreage due to more accurate mapping.

* Stage, Northwest Area, Utah DOF. Seven miles north of Vernon, UT. Timber, brush and tall grass. Active fire behavior with running and torching. Structures threatened. Sage-grouse habitat threatened.
* Davis, Salt Lake District, BLM. Four miles southeast of Dugway, UT. Short grass. Active fire behavior with wind-driven runs. Structures threatened.
* Little Valley, Salt Lake District, BLM. Ten miles west of Vernon, UT. Timber and tall grass. Moderate fire behavior with creeping.

MM155, Winnemucca District, BLM. Twenty-one miles southwest of Winnemucca, NV. Brush and short grass. Moderate fire behavior with group torching, creeping and smoldering. Numerous structures threatened. Sagegrouse habitat threatened.

Four Seasons Complex (2 fires), Elko District, BLM. 2 (Goff). IMT is also managing Roosters Comb incident. Started on state land 50 miles north of Battle Mountain, NV. Brush and tall grass. Active fire behavior. Structures threatened. Sage-grouse habitat threatened.

Roosters Comb, Northern Region, Nevada DOF. Twenty-five miles north of Battle Mountain, NV. Brush and tall grass. No new information.

Water Tower, Uinta/Wasatch-Cache NF. One mile east of Alpine, UT. Timber and brush. Minimal fire behavior. Reduction in acreage due to more accurate mapping.

Brianhead, Southwest Area, Utah DOF. One mile north of Brian Head, UT. Timber and hardwood litter. Minimal fire behavior. Road, area and trail closures in effect.

Bravo17, Fallon Naval Air Station, DOD. Transfer of command from IMT 2 (Rohrer) back to the local unit will occur today. Started on BLM land 25 miles east of Fallon, NV. Closed timber litter, brush and short grass. Minimal fire behavior. Last report unless significant activity occurs.

Predictive Services Discussion: High pressure centered over the Great Plains will continue to allow for a strong monsoonal flow to continue over the Southwest where more scattered, wet storms are expected. Further north, breezy and very dry conditions are expected across northern California and the Northern Great Basin as a trough of low pressure begins to approach the Pacific Northwest. Scattered wet and dry storms are expected across the intermountain west and could trigger new starts. In Alaska, scattered storms will be possible across the central interior as a weak disturbance moves through the ridge of high pressure that is currently positioned over the state. More significant precipitation is expected west of Galena along the Bering Sea coastline and over the Aleutian Islands.

# FIRE SHELTER DEPLOYMENT SITE SELECTION 

Operational Engagement Category

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to deploy their fireshelters. The key to a successful fire shelter deployment is proper site selection. Consider the following when discussing shelter deployment site selection.

- Pick a site that will keep the fire shelter away from flames and convective heat. The site also should limit the amount of radiant heat that reaches the shelter.
- Select an area with no fuels. If that isn't possible, select a site in light fuels, such as grass, where the flaming front will pass quickly. Clear the site to mineral soil if at all possible. If time is critical, pick a site with the least fuel.
- Pick natural firebreaks (such as wet meadows; creek beds; wet, swampy areas; large rockslides with no fuels). Rough terrain in rockslides may make it difficult to seal the fire shelter to the ground.
- Areas on the lee side of ridgetops and knobs can be effective deployment sites because convective heat and flames will generally continue rising above them.
- Wide areas that have been cleared of fuel, such as dozer lines or roads, can be effective deployment sites. In larger areas, don't let truck, dozers, and other equipment occupy the best deployment sites.
- Flat areas on slopes, such as benches or road cuts, offer some protection from radiant and convective heat. Level areas like these can keep you under the path of flames and convective heat.
- The ditch on the inside of the road, iffree of fuel may be an effective deployment site on a road.
- Consider vehicletraffic.
- Avoid areas that tend to funnel smoke, flames and hot gasses, such as:
- Narrow draws
- Saddles on ridgetops
- Chimneys and chutes
- Know how long it takes to reach your safety zone. Crew supervisors should identify and communicate escape routes and safety zones.
- If you're not in a suitable shelter deployment area, keep escaping while watching for a possible deployment site.
- Ensure sites are clearly identified and marked.
