

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, July 20, 2017 – 0530 MT
National Preparedness Level 4**

National Fire Activity

Initial attack activity:	Light (155) new fires
New large incidents:	13
Large fires contained:	4
Uncontained large fires:**	34
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	7

**Uncontained large fires include only fires being managed under a full suppression strategy.

Great Basin Area (PL 4)

New fires:	29
New large incidents:	1
Uncontained large fires:	9
Type 2 IMTs committed	4

Missouri, Payette NF. IMT 2 (Roide). One miles southwest of Yellow Pine, ID. Timber and brush. Active fire behavior with running, crowning and short-range spotting. Road, trail and area closures in effect.

* **Onaqui Mountain Complex** (2 fires), Salt Lake Field Office, BLM. Complex includes previously reported Davis and Little Valley fires. Ten miles southeast of Dugway, UT. Brush and tall grass. Minimal fire behavior. Residences threatened. Sage-grouse habitat threatened.

Grass Valley, Winnemucca District, BLM. IMT 2 (Bird). Sixteen miles south of Winnemucca, NV. Brush and short grass. Minimal fire behavior. Structures threatened. Sage-grouse habitat threatened.

Cedar Mountain, Salt Lake Field Office, BLM. Twenty-three miles west of Grantsville, UT. Brush and tall grass. Active fire behavior with running and flanking.

Long Valley, Northern California District, BLM. IMT 2 (Fogle). Fifty miles north of Reno, NV. Brush and short grass. Minimal fire behavior. Residences threatened. Area and trail closures in effect.

Four Seasons Complex (2 fires), Elko District, BLM. IMT 2 (Goff). IMT is also managing the Roosters Comb fire. Started on state land 50 miles north of Battle Mountain, NV. Brush and tall grass. No further information received.

Roosters Comb, Northern Region, Nevada DOF. Twenty-five miles north of Battle Mountain, NV. Brush and tall grass. Minimal fire behavior.

MM155, Winnemucca District, BLM. Twenty-one miles southwest of Winnemucca, NV. Brush and short grass. Minimal fire behavior. Sage-grouse habitat threatened.

Oil Well, Northern Region, Nevada DOF. Six miles north of Elko, NV. Brush and tall grass. Minimal fire behavior.

Water Tower, Uinta/Wasatch-Cache NF. One mile east of Alpine, UT. Timber and brush. Minimal fire behavior. Reduction in acreage due to more accurate mapping.

Brianhead, Southwest Area, Utah DOF. One mile north of Brian Head, UT. Timber and hardwood litter. Minimal fire behavior. Road, area and trail closures in effect.

Predictive Services Discussion: The hot ridge of high pressure over the southern Great Plains will migrate east to be over the Lower Mississippi River Valley. This will allow for the Southwest monsoon to move further north across the interior west as far north as northern Montana. Critical fire weather conditions are expected across the Pacific Northwest, northern Great Basin, and Northern Rockies as the cold front moves inland increasing winds over the established very dry airmass. Isolated dry convection is possible along the frontal boundary. In Alaska, the ridge of high pressure will move into the Yukon Territory as a low pressure system along the coast drops south onto the Alaskan Peninsula. Isolated convection is expected to continue across the interior east, while scattered showers are expected to occur across the interior west.

Proper Use of Trigger Points

Weather/Fire Behavior Category

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of tactics. Monitoring for the 18 Watchout Situations and establishing operational / environmental limits (“trigger points”) ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the current and potential situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don’t wait until you’re in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
 - RH
 - Winds
 - Fire Behavior
 - Topographical boundaries
 - Time constraints/Time of day
 - Time/distance to safety zones
 - Loss of suppression resources
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is required. (See the Incident Response Pocket Guide)
 - Gather information to assure good Situational Awareness
 - Assess hazards to anticipate serious risks
 - Establish hazard controls to mitigate serious risks
 - Make decisions based on your ability to mitigate those serious risks
 - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
 - Account for all your people
 - Make sure everyone knows and follows the new plan
