## Northern Rockies Area (PL 4)

| New fires: | 11 |
| :--- | :---: |
| New large incidents: | 0 |
| Uncontained large fires: | 20 |
| Type 1 IMTs committed | 2 |
| Type 2 IMTs committed | 5 |

Lodgepole Complex (4 fires), Miles City Field Office, BLM. IMT 2 (Connell). Includes previously reported South Breaks, Bridge Coulee, Square Butte and Barker fires. Fifty-two miles northwest of Jordan, MT. Timber,
brush and short grass. Active fire behavior with running, torching and short-range spotting. Sage-grouse habitat and structures threatened. Evacuations and road closures in effect.

Sunrise, Lolo NF. IMT 2 (Pearson). IMT is also managing the Burdette fire. Eleven miles east of Superior, MT. Timber and brush. Active fire behavior with crowning, group torching and long-range spotting. Structures threatened. Road and area closures in effect.

Burdette, Lolo NF. Thirteen miles southeast of Tarkio, MT. Timber. Active fire behavior with isolated torching and short-range spotting.

Goat Creek, Lolo NF. IMT 2 (Leach). IMT is also managing the Little Hogback and Sliderock fires. Nine miles southeast of Clinton, MT. Timber. Active fire behavior with backing, creeping and single-tree torching. Structures threatened. Evacuations, road, trail and area closures in effect.

Little Hogback, Lolo NF. Twenty miles northwest of Stevensville, MT. Timber. Active fire behavior with backing, creeping and single-tree torching. Road, trail and area closures in effect.

Sliderock, Lolo NF. Twenty-eight miles southeast of Missoula, MT. Timber and closed timber litter. Active fire behavior with backing, creeping and single-tree torching. Structures threatened. Road, trail and area closures in effect.

Park Creek, Helena-Lewis and Clark NF. IMT 2 (Hutton). IMT is also managing Arrastra Creek fire. Two miles north of Lincoln, MT. Timber. Active fire behavior with backing, creeping and single-tree torching. Structures threatened. Area closures in effect.

Arrastra Creek, Helena NF. Six miles northwest of Lincoln, MT. Timber. Active fire behavior with running, backing and group tree torching. Area closures in effect.

Lolo Peak, Lolo NF. IMT 1 (Poncin). Nine miles west of Carlton, MT. Timber. Moderate fire behavior with backing, running and single-tree torching. Road, trail and area closures in effect.

Whetstone Ridge, Beaverhead/Deerlodge NF. IMT 1 (Turman). IMT is also managing the Meyers fire. Twenty-five miles southwest of Philipsburg, MT. Timber and heavy logging slash. Active fire behavior with group torching and short-range spotting. Area closures in effect.

Meyers, Beaverhead/Deerlodge NF. Twenty-five miles southwest of Philipsburg, MT. Timber and logging slash. Active fire behavior with group torching and short-range spotting. Area closures in effect.

Powerline, Craig Mountain Area, IDL. Transfer of command from IMT 2 (Almas) back to the local unit will occur on 7/26. IMT is also managing the Corral Creek fire. Fifteen miles west of Winchester, ID. Brush and grass. Minimal fire behavior. Structures threatened. Road and area closures in effect.

Corral Creek, Craig Mountain Area, IDL. Fifteen miles east of Anatone, ID. Brush and tall grass. Minimal fire behavior. Structures threatened. Road and area closures in effect.

Chinn, Central Land Office, Montana DNR. Started on county land 12 miles south of White Sulphur Springs, MT. Timber, brush and tall grass. Moderate fire behavior with creeping, smoldering and isolated torching. Structures threatened.

Lookout, Central Land Office, Montana DNR. Seven miles northwest of Sieben, MT. Timber. No new information.

Yooper, Miles City Field Office, BLM. Started on private land 34 miles northwest of Sidney, MT. Timber. Minimal fire behavior.

Crying, Petroleum County. Fifty miles north of Winnett, MT. Timber, brush and short grass. Minimal fire behavior. Structures threatened.

Microwave, Crow Agency, BIA. Thirty-seven miles southeast of Billings, MT. Brush and tall grass. Minimal fire behavior.

Coyote, Northern Cheyenne Agency, BIA. Twenty-two miles southwest of Ashland, MT. Timber and short grass. Minimal fire behavior.

Sage Hills, Yellowstone County. Four miles south of Billings, MT. Timber and brush. Minimal fire behavior. Residences threatened. Road closures in effect.

Predictive Services Discussion: Critical fire weather conditions are possible across Oregon, the Northern Rockies, and northern Great Basin as a cold front moves east across the northwest and pulls warm, moist, and unstable air further north from the weakening disturbance located along the Northern Californian coast. Scattered to numerous storms are expected, but they will turn wet. Meanwhile across the Southwest, the strong, wet monsoonal flow will continue to produce wetting precipitation from storms that could reach as far northwest as Southern California. In Alaska, a strong disturbance moving east across the interior will bring widespread wetting rainfall to dry areas.

SAFETY ZONES 1 (LCES)<br>Operational Engagement Category

A safety zone is a location where the threatened firefighter can find adequate refuge from an approaching fire.

What is the difference between a safety zone and a deployment site?

- The safety zone is the area where a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.

How do you identify a good safety zone?

- Consider the distance from the escaped fire as well as topography, winds, fire behavior, and fuels in the area.
- The best locations are usually "in the black;" those with a minimum of, or devoid of, ground/aerial vegetation; or large bodies of water.
- Location is scouted and marked well for visibility at all times.
- Location has been reassessed in relation to line work progress, fatigue, changes in fire behavior, and arrival of additional resources.
- For radiant heat only, the distance separation between the firefighter and the flames must be at least four times the maximum flame height. This distance must be maintained on all sides, if the fire has ability to burn completely around the safety zone. Convective heat from wind and/or terrain influences will increase this distance requirement.
- Take advantage of heat barriers such as lee side of ridges, large rocks, or solid structures.
-What should you avoid in selecting a safety zone?
- Avoid locations that are downwind from the fire.
- Avoid locations that are in chimneys, saddles, or narrow canyons.
- Avoid locations that require a steep uphill escape route.

Have an idea? Have feedback? Share it.

[^0]:    * Alameda, Santa Fe NF. Thirty-one miles northeast of Cuba, NM. Timber litter and understory. Minimal fire behavior. Last report unless significant activity occurs.
