Predictive Services Discussion: Scattered, mainly wet storms will continue across the intermountain west as the monsoonal moisture plume reaches further north and into Canada by afternoon. Storms along the western fringes over Nevada and Oregon may be on the dry side. Temperatures across the west will begin to climb upward as the Four Corners high pressure ridge begins to re-strengthen over the Four Corners. Afternoon humidity levels will be slightly lower than previous days, generally in the lower to middle teens with some upper single digit readings possible in some of the drier locations in the desert. Winds will be generally diurnallydriven except across the Columbia Basin where they will be breezy and from the Southwest in the afternoon.

# RESPONDING TO VEHICLE FIRES 

Vehicles/Roads Category.

Suppression of vehicle fires is extremely dangerous and poses many health and safety hazards to firefighters. The following procedures are recommended:

- Wear a high visibility reflective vest or other high visibility clothing if available.
- Secure the scene and provide or request assistance for traffic control.
- Park your vehicle to provide a protective barricade for you and your crew. Position it so that an inattentive or drunk driver will hit your vehicle and not your crew. Your vehicle is expendable, you are not.
- Provide for your escape route at the scene.
- Do not use road flares if fuel is leaking from the vehicle.
- DO NOT BREATHE ANY SMOKE. Smoke from vehicle fires contains toxic chemicals that will kill you.
- Vehicle fires are considered a hazardous materials scene. Suppression action should only be taken if the crew is trained, equipped, and authorized in the use of Self-Contained Breathing Apparatus (SCBA).
- If taking suppression action on wildland fuels, firefighters should ensure that they are a safe distance from the burning vehicle (100-feet minimum), and avoid contact with vehicle fire smoke or fumes.

[^0]:    * Orleans Complex, Six Rivers NF. Fifteen miles southwest of Happy Camp, CA. Timber and brush. Moderate fire behavior with uphill runs and short crown runs. Structures threatened.
