Predictive Services Discussion: The upper level low pressure area located along the northern California and Oregon coastlines will continue to pull significant monsoonal moisture north into northern California, the Pacific Northwest, northern Great Basin, and the Northern Rockies. Significant lightning activity is expected. The scattered storms will be a mixture of dry and wet, with most being on the dry side, except across Utah and western Oregon where they could be wet. A dry period will begin to emerge over southern California and Arizona as the monsoonal moisture is displaced northward. Temperatures across the West will be near normal. Further east, the cooler than average northwesterly flow will continue across the Great Plains. A stalled cold front will linger over the Deep South and the southern Great Plains. This should lead to a continuance of wet conditions from Texas east through Georgia.

TAKING A NAP NEAR THE FIRELINE
Operational Engagement Category

Firefighting is often exhausting work and firefighters can find themselves needing to sleep while on the fireline. Before pausing to rest, firefighters must weigh the following considerations:

- Are lookouts posted? Discuss who that lookout can be. Can the lookout on the knob across the draw watch over you or does it need to be your partner on the fireline alternating rest times?
- Is the area free of hazards? (Falling snags or rolling materials) Discuss what you need to do to create a safe resting area.
- Are you still within agency work and rest guidelines? Review what these guidelines are.
- Does your crew need a break? Have they been pushed too hard? Talk about situations where you need to simply take yourself and/or your crew off the fire for uninterrupted rest.
- To reduce risks:
- Keep lookouts posted; rotate lookouts.
- Communicate crew conditions and status to supervisor or chain-of-command contact. Have firefighters discuss ways that they find to rest on the fireline and suggestions for methods to alternate shifts for more effective firefighting.
