# National Interagency Coordination Center Incident Management Situation Report <br> Wednesday, August 9, 2017 - 0530 MT National Preparedness Level 4 

## National Fire Activity

Initial attack activity:
New large incidents:
Light (146) new fires
Large fires contained:
6
Uncontained large fires:**5

Area Command Teams Committed: 1
NIMOs committed:2

Type 1 IMTs committed: 7
Type 2 IMTs committed:
17
**Uncontained large fires include only fires being managed under a full suppression strategy. Link to Geographic Area daily reports.

One MAFFS C-130 airtanker and support personnel each from the 152 Airlift Wing, (Nevada Air National Guard), $153^{\text {rd }}$ Airlift Wing, (Wyoming Air National Guard) and the $302^{\text {nd }}$ Airlift Wing (Colorado Springs, Air Force Reserve) have been deployed to Fresno, CA in support of wildland fire operations.

New fires: 21
New large incidents: 2
Uncontained large fires: 5
Area Command teams committed: 1
Type 1 IMTs committed: 3
Type 2 IMTs committed: 6

Area Command Team (Stutler) is managing large fires on the Lolo National Forest and Flathead Reservation.

* Gibralter Ridge, Kootenai NF. IMT 2 (Connell). Seven miles east of Eureka, MT. Timber. Extreme fire behavior with uphill runs. Evacuations, trail and area closures in effect.

Rice Ridge, Lolo NF. IMT 2 (Goldman). Six miles north of Seeley Lake, MT. Timber. Active fire behavior with group torching, uphill runs and short-range spotting. Structures threatened. Road, trail and area closures in effect.

Sunrise, Lolo NF. IMT 1 (Turman). IMT is also managing the Burdette fire. Eleven miles east of Superior, MT. Timber and brush. Active fire behavior with short-range spotting, isolated torching and flanking. Structures threatened. Evacuations, road, trail and area closures in effect.

Burdette, Lolo NF. Thirteen miles southeast of Tarkio, MT. Timber. Moderate fire behavior with backing, creeping and smoldering.

Sapphire Complex (3 fires), Lolo NF. IMT 2 (Thompson). Fifteen miles southeast of Clinton, MT. Timber. Active fire behavior with backing and group torching. Structures threatened. Road, trail and area closures in effect.

Lolo Peak, Lolo NF. IMT 1 (Livingston). Ten miles southwest of Lolo, MT. Timber. Active fire behavior with torching, short crown runs and spotting. Road, trail and area closures in effect.

Meyers, Beaverhead - Deerlodge NF. IMT 2 (Almas). Twenty-five miles southwest of Philipsburg, MT. Timber. Active fire behavior with group torching. Structures threatened. Evacuations, road and area closures in effect.

Hanover, Nez Perce - Clearwater NF. IMT 2 (Leach) Four miles northeast of Florence, ID. Timber, brush and grass. Moderate fire behavior with uphill runs and long-range spotting. Structures threatened. Road, trail and area closures in effect.

Liberty, Flathead Agency, BIA. IMT 1 (McGowan). Seventeen miles southeast of Arlee, MT. Timber. Minimal fire behavior with backing, flanking and creeping. Road, trail and area closures in effect.

Park Creek, Helena - Lewis and Clark NF. IMT 2 (Zombro). IMT is also managing the Arrastra Creek fire. Two miles north of Lincoln, MT. Timber. Minimal fire behavior with backing and creeping. Structures threatened. Area closures in effect.

Arrastra Creek, Helena - Lewis and Clark NF. Six miles northwest of Lincoln, MT. Timber. Minimal fire behavior with backing and creeping. Structures threatened. Area closures in effect.

* Potato, Miles City Field Office, BLM. Started on private land thirty-eight miles south of Ekalaka, MT. Short grass and brush. Minimal fire behavior. Sage grouse habitat threatened.

## Northwest Area (PL 4)

| New fires: | 7 |
| :--- | :--- |
| New large incidents: | 1 |
| Uncontained large fires: | 8 |
| NIMOs committed | 2 |
| Type 1 IMTs committed: | 3 |
| Type 2 IMTs committed: | 5 |

Blanket Creek, Rogue River - Siskiyou NF. IMT 1 (von Tillow) and IMT 2 (Gales). IMT 2 (Gales) is also managing the Spruce Lake fire. Nine miles northeast of Prospect, OR. Timber. Active fire behavior with torching and spotting. Structures threatened. Road, trail and area closures in effect.

Spruce Lake, Crater Lake National Park. Fifteen miles southwest of Diamond Lake, OR. Timber. Moderate fire behavior with isolated torching and flanking. Structures threatened. Road, trail and area closures in effect.

Whitewater, Willamette NF. IMT 2 (Knerr). Ten miles east of Idanha, OR. Timber and brush. Active fire behavior with backing and single-tree torching. Structures threatened. Road, trail and area closures in effect.

Noisy Creek, Colville, NF. IMT 2 (Rabe). Six miles southeast of Metaline Falls, WA. Timber and brush. Active fire behavior with backing, flanking and uphill runs. Evacuations, road, trail and area closures in effect.

Bear Butte, Wallowa - Whitman NF. IMT 2 (Goff). Twenty miles northwest of Baker City, OR. Timber. No new information.

* Flounce, Medford District, BLM. ODF IMT 1 (Hessel). Started on state land 12 miles northwest of Shady Cove, OR. Timber, brush and tall grass. Active fire behavior with running, short-range spotting and group torching. Structures threatened. Evacuations in effect.

Diamond Creek, Okanogan - Wenatchee NF. Transfer of command from IMT 1 (Schulte) back to the local unit will occur tomorrow. Twenty-five miles north of Winthrop, WA. Timber and grass. Active fire behavior with crowning, running and spotting. Structures threatened. Road, trail and area closures in effect.

Chetco Bar, Rogue River - Siskiyou NF. NIMO (Houseman). Sixteen miles west of Selma, OR. Timber and brush. Minimal fire behavior with backing and flanking. Road and trail closures in effect.

Indian Creek, Mt. Hood NF. NIMO (Quesinberry). Six miles south of Cascade Locks, OR. Timber. Moderate fire behavior with creeping and smoldering. Trail and area closures in effect.

Cinder Butte, Burns District, BLM. Transfer of command from IMT 2 (Ciraulo) back to the local unit will occur today. Ten miles west of Riley, OR. Timber, brush and tall grass. Minimal fire behavior with creeping and smoldering. Sage-grouse habitat threatened. Reduction in acreage due to more accurate mapping. Last report unless significant activity occurs.

Suiattle, Northwest Region - DNR. Nine miles northeast of Darrington, WA. Timber. No new information.
Devils Lake, Fremont - Winema NF. Seven miles southeast of Bly, OR. Timber and short grass. No new information.

Clarks Creek, La Grande District, Oregon Department of Forestry. Eighteen miles northeast of La Grande, OR. Timber and short grass. Minimal fire behavior.

Predictive Services Discussion: With the upper level disturbance remaining entrenched along the coast of Northern California, expect for another day of widely scattered convection across the northwestern states. Storms will be a mix of dry and wet, and new fire starts are expected. Dry conditions will continue over Southern California as a weakening ridge of high pressure over the Pacific Ocean begins to retreat. The monsoonal flow and associated convection will begin to redevelop over the Four Corners Region as temperatures return to being above normal beneath a re-strengthening of the high pressure ridge centered over New Mexico. In the east, westerly flow will bring near normal temperatures along with breezy winds to the central Great Plains.

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?
Wildland Fire History"

## Sadler Fire Entrapment - August 9th 1999 - Nevada

On August 5, 1999, a dry lightning storm passes through northern Nevada that ignites numerous fires. Due to a wet winter and spring, the fuels are abnormally heavy. Now, deep into summer, these fuels are measuring less than $80 \%$ live fuel moisture. Normal fire suppression tactics have not been effective on previous fires, particu-larly direct attack and burning operations during the heat of the day. The weather and fire behavior forecasts predict extreme burning conditions. This same day as the lightning storm, a Type 2 crew-the GNP3-is assembled in California. This crew consists of 21 members (17 FFT2s) from fuels and suppression modules as well as non-fire and overhead positions from various home units. The following day, they are dispatched to the Sadler Complex south of Elko, Nevada. During the next two days, they work on the fireline. The next day, August 9, while conducting a burnout operation, six firefighters from the GNP3 crew are entrapped by wildfire.

0600 Briefing starts unannounced and several crews and overhead miss some or all of it. Briefing places little emphasis on a red flag warning that has been issued for high winds, low RH, and unstable atmospheric conditions. The IAP forecast calls for extreme fire behavior with high rates of spread, south winds increasing in afternoon, minimum RH 6-12\%, Haines Index of 6, max temp 85-91, and FDFM of 3\%. However, there are not enough IAPs for everyone-including the GNP3 crew boss and a DIVS. Extreme fire behavior is discussed at the GNP3 crew briefing and is characterized as "normal".

0900 GNP3 is assigned to support 2 Interagency Hotshot Crews asked to burnout from Big Safety Zone to the NW and the dozer line to Black Safety Zone. The dozer line is about $1 / 2$ mile north of the head of the fire.

1100 After a recon, the hotshot superintendents refuse to accept burnout assignment until the line south of Big Safety Zone is secure. The DIVS and the 2 IHCs leave to do the other burnout. GNP3 waits.

1300 GNP3 accepts assignment to burn out across the head of the fire from Black Safety Zone going east to the " $Y$ ".

1400 Ignition is delayed due to unfavorable winds. Overhead feels if they "didn't attempt a burn, the fire would get away". Plan is changed to burnout from the east to the west instead-the very plan that the hotshots had refused.

1430 Due to concerns regarding GPN3 crew's lack of experience and fitness, only 3 members and the crew boss are used for the firing operation.

1500 This squad begins firing from the " $Y$ "-without an anchor point-supported by an engine. The fireline behind them is unsecured. Due to hills, no one on the burnout squad can see the main fire. There are no aircraft to assist as lookout. Because of occasional wind shifts, the igniters must walk very fast and occasionally trot to keep ahead of their fire. They are unable to use
the black as a safety zone. For these burning conditions, safety zones along the dozer line are too small and too far apart.
1515 Back behind the firing squad, the engine is very busy picking up multiple spot fires and slopovers. The engine captain radios to stop ignition. There is no response. The same tactical channel is also being used by the other burnout and is overloaded with traffic.

1530 Half way through the 1.3 mile burnout, two more GNP3 members join the firing squad.

1540 Overhead watching the burnout sees the main fire become visible and take off down the hill toward the squad. They attempt to warn the squad but are unable to make radio contact. Shortly after, the main fire becomes visible to the squad as it crests the ridge to the south. It is described as a "river of fire" as it makes a run at the dozer line and the crew at speeds in excess of 300 chains per hour with 15 ft . flame lengths.

The engine is cut off from the squad and retreats to a safety zone. The order to "run" is given to the firing squad. Tools and gear are dropped on the way to the safety zone, almost 600 ft . away. Several crewmembers unsuccessfully attempt to deploy their fire shelters.

Crew members receive $1^{\text {st }}$ and $2^{\text {nd }}$ degree burns and smoke inhalation. An injured crewmember, an EMT, suffering from smoke inhalation, is asked to provide first aid for the others.

- What are your responsibilities if you are asking another resource to take an assignment that has previously been turned down?
- The burnout was a potentially dangerous assignment. What will you do to size up your resource's capabilities and experience and assign them to appropriate tasks?
- As a crew/crewmember, you have a responsibility to look after your own safety-which includes the right to accept or reject an assignment. Using the IRPG page 19, have everyone discuss how to properly refuse risk.
- Discuss how you and your crew would apply LCES throughout the day on this incident.
