Predictive Services Discussion: A monsoonal southwesterly flow will produce scattered, mainly wet storms across the Four Corners and central Rockies regions as a front dropping south from south central Canada into the northern Great Plains pulls moisture northward along the Continental Divide. An easterly flow will redevelop over Montana and Wyoming as the associated cold front moves west across both states. Isolated storms will be possible across the Pacific Northwest as the low pressure area along the Californian Coast weakens and moves off to the northeast. Westerly flow will continue to bring seasonal temperatures to the East. A stalled cold front along the coast will produce wet conditions along the Atlantic Coast from New Jersey south through Florida.

Lookouts are often better situated to notice the cumulative changes of fire behavior.

* Fire Order \#5 says "Post lookouts when there is possible danger." Should you utilize lookouts at all times?
- Lookouts should be posted at all times.
-What are you looking for when you are selecting a lookout location?
- Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.
- Never rely exclusively on aircraft as your lookout.

What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout person?

- Experienced firefighter.
- Solid knowledge of fire behavior and ability to recognize and monitor other environmental hazards.
- Knowledge of crew locations, escape and safety locations and trigger points.
- Good communicator--keeps the crew advised of fire behavior changes, tracks weather trends and relays the information, informs crew of work progress and updates from the latest strategy and tactical briefings.
- Monitors and accounts for all individuals within his/her assigned area at all times, and will notify others if breaks are needed.
- What is the necessary equipment for a lookout?
- PPE, radio with extra batteries, compass, binoculars, belt weather kit, IAP, map, food, water and watch.
