Predictive Services Discussion: Convection along the West Coast will begin to wane as the moisture plume refocuses along a weakening frontal boundary located just west of the Continental Divide. Scattered storms across eastern Washington, Idaho, and Western Montana will be a mix of dry and wet and will likely trigger new initial attack. While dry conditions are expected across much of California, the Four Corners region will see the monsoon return to full strength as scattered to numerous wet storms redevelop by afternoon. Looking elsewhere, breezy but dry conditions are expected from the Great Plains east through the Ohio River Valley while wet, stormy conditions are expected along the Atlantic Seaboard.

Working Safely Around Pack Stock (Horses and Mules)

Miscellaneous Fireline Hazards

Fire crews often receive supplies that are transported by pack stock. While these animals provide fire crews a valuable service, they can cause injury to themselves and personnel, and severely damage food, gear and fire equipment if not handled properly.

Much like adding aviation resources to a fire incident, having pack stock around is adding an additional hazard to the fire environment which increases the difficulty in maintaining situational awareness. Fire personnel must be aware that human activity, aircraft, wildlife and weather conditions can and will affect the behavior of the pack animals, often unpredictably.

- Avoid making any sudden or abrupt moves or making any loud or unusual noises around the stock. Be calm, relaxed, steady and smooth around the animals at all times.
- When passing pack stock on the trail, know your escape routes at all times. Move off the trail before the stock passes. Calmly move to the same side, preferably the downhill side, with all of your gear. Be far enough off the trail that no one could get kicked, but close enough for the stock to see everyone. Talk to the packer and the stock as they approach and pass...this helps the stock know that you and your crew are not something to be afraid of.
- Packers, like all fire personnel, must maintain communications at all times. Ensure that the communication plan is known to everyone. Individual forest and park units will have the specific safety-related guidelines identified for Packers in regards to required fire training, PPE, communications, etc.
- Work around pack stock in the same manner you would work around many types of helicopters:
$\checkmark$ Stay outside of the safety circle unless invited or escorted in
$\checkmark$ Only approach from the front
$\checkmark$ Never approach from the tail or walk around the tail
$\checkmark$ Don't run, wave arms, throw tarps or anything else
$\checkmark$ Put your gear where directed and in an orderly manner
$\checkmark$ Weigh everything. Weight and balance are important on mules and helicopters!
