Predictive Services Discussion: A cold front will push through the Northwest and into the Northern Rockies. Scattered thunderstorms will form ahead of the front across western Montana and eastern Idaho and move toward the High Plains. Scattered showers and thunderstorms will also develop over the central and southern Rockies and stretch along another front Texas to the Mid-Atlantic. Windy conditions will develop in the Northwest and Northern Rockies behind the cold front. Mild temperatures will cover much of the northwestern U.S., the northern Plains, the Midwest, and the Northeast. Warm weather will continue in the southern states with hot conditions in the desert Southwest and in far South Texas.

OPERATIONAL BRIEFINGS
Fire Communications Category

Operational briefings are critical to safe fire operations. To ensure a consistent and effective briefing, a standardized briefing checklist should always be used. The following checklist is printed on the cover of the NWCG Incident Response Pocket Guide:

- Situation:
- Fire name, location, map orientation, other incidents in the area
- Terrain influences
- Fuel type and conditions
- Fire weather (previous, current, and expected)
- Fire behavior (previous, current, and expected)
- Mission/Execution:
- Command (Incident Commander/immediate supervisor)
- Leader's intent
- Specific tactical assignments
- Contingency plans
- Communications:
- Communication Plan (tactical, command, air/ground frequencies, cell phone numbers, etc.)
- Medevac Plan
- Service/Support:
- Other resources that may be working adjacent to you and those available to order
- Aviation operations
- Logistics (e.g., transportation, supplies, equipment)
- Risk Management:
- Identify known hazards and risks
- Identify control measures to eliminate hazards and reduce risk
- Identify trigger points for disengagement or reevaluation of operational plan
