

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, August 26, 2017 – 0530 MT
National Preparedness Level 5**

National Fire Activity

Initial attack activity:	Light (141) new fires
New large incidents:	7
Large fires contained:	11
Uncontained large fires:**	38
Area Command Teams Committed:	1
NIMOs committed:	2
Type 1 IMTs committed:	10
Type 2 IMTs committed:	22

**Uncontained large fires include only fires being managed under a full suppression strategy.
[Link](#) to Geographic Area daily reports.

One MAFFS C-130 airtanker and support personnel each from the 146th Airlift Wing, (California Air National Guard), 153rd Airlift Wing, (Wyoming Air National Guard) and the 302nd Airlift Wing (Colorado Springs, Air Force Reserve) have been deployed to Fresno, CA in support of wildland fire operations.

One RC-26 aircraft and support personnel from the 141st Aerial Refueling Wing (Washington Air National Guard) has been deployed to Fairchild AFB (Spokane, WA) in support of wildland fire operations.

One RC-26 aircraft and support personnel from the 187th Fighter Wing, (Alabama Air National Guard) has been deployed to Redding Municipal Airport (Redding, CA) in support of wildland fire operations.

Chetco Bar, Rogue River - Siskiyou NF. Transfer of command from IMT 2 (Greer) and NIMO (Houseman) to IMT 1 (Livingston) will occur today. Sixteen miles west of Selma, OR. Timber and brush. Moderate fire behavior with backing, flanking and isolated torching. Structures threatened. Evacuations, road, trail and area closures in effect.

Milli, Deschutes NF. IMT 1 (Pierson). Nine miles west of Sisters, OR. Timber. Moderate fire behavior with backing, flanking and torching. Residences threatened. Road, trail and area closures in effect.

Umpqua North Complex, (9 fires), Umpqua NF. IMT 1 (T. Kurth) and IMT 1 (J.Kurth). Fifty miles east of Roseberg, OR. Timber, brush and grass. Moderate fire behavior with flanking, uphill runs and single-tree torching. Structures threatened. Evacuations, road, trail and area closures in effect.

Bridge Creek, Colville Agency, BIA. Transfer of command from IMT 2 (Sheldon) to IMT 2 (Rabe) will occur today. Eleven miles northeast of Keller, WA. Timber and tall grass. Active fire behavior with backing and torching. Road closures in effect.

Jones, Willamette NF. Transfer of command from IMT 2 (Ciraulo) to IMT 2 (Harrod) will occur today. Ten miles northeast of Lowell, OR. Timber and grass. Active fire behavior with running, flanking and spotting. Structures threatened. Road, trail and area closures in effect.

Miller Complex, (5 fires), Rogue River - Siskiyou NF. IMT 1 (Pechota). Seventeen miles east of Cave Junction, OR. Timber. Moderate fire behavior with uphill runs and backing. Structures threatened. Road, trail and area closures in effect.

Whitewater, Willamette NF. Transfer of command from IMT 1 (Schulte) to IMT 1 (Day) will occur tomorrow. IMT is also managing the Rebel and Horse Creek Complex fires. Ten miles east of Idanha, OR. Timber and brush. Moderate fire behavior with backing, spotting and short crown runs. Structures threatened. Road, trail and area closures in effect.

Rebel, Willamette NF. Twenty-two miles north of Oakridge, OR. Timber. Moderate fire behavior with backing, flanking and single-tree torching. Road, trail and area closures in effect.

Horse Creek Complex, (3 fires), Willamette NF. Seven miles south of Belknap Springs, OR. Timber. Moderate fire behavior with backing, flanking and single-tree torching. Structures threatened. Road, trail and area closures in effect.

High Cascades Complex, (3 fires), Rogue River - Siskiyou NF. IMT 2 (Knerr). Nine miles northeast of Prospect, OR. Timber. Active fire behavior with creeping, short-range spotting and group torching. Structures threatened. Road, trail and area closures in effect.

Staley, Willamette NF. IMT 2 (Goff). Twenty-three miles south of Oakridge, OR. Timber and brush. Active fire behavior with group torching, short-range spotting and backing. Road, trail and area closures in effect.

Norse Peak, Okanogan - Wenatchee NF. IMT 2 (Gales). IMT is also managing the American and Union Creek fires. Eleven miles west of Cliffdell, WA. Timber. Active fire behavior with backing, flanking and group torching. Residences threatened. Road, trail and area closures in effect.

American, Okanogan - Wenatchee NF. Eleven miles west of Cliffdell, WA. Timber. Active fire behavior with flanking, backing and group torching. Residences threatened. Evacuations, road, trail and area closures in effect.

Union Creek, Okanogan - Wenatchee NF. Eleven miles west of Cliffdell, WA. Timber. Active fire behavior with group torching, backing and flanking. Residences threatened. Evacuations, road, trail and area closures in effect.

Jolly Mountain, Okanogan - Wenatchee NF. Transfer of command from IMT 2 (Sinclair) to IMT 2 (Roide) will occur today. Thirteen miles northwest of Cle Elum, WA. Timber. Extreme fire behavior with backing and flanking. Structures threatened. Road, trail and area closures in effect.

Falcon Complex, (4 fires), Umpqua NF. Transfer of command from IMT 2 (Johnson) to IMT 2 (Knerr) will occur today. Twenty-five miles east of Tiller, OR. Timber, brush and grass. Active fire behavior with flanking, backing and short-range spotting. Structures threatened. Road and trail closures in effect.

Nena Springs, Warm Springs Agency, BIA. Seven miles northeast of Simnasho, OR. Timber and short grass. Moderate fire behavior with creeping and torching. Area closures in effect.

Scatter Creek, South Puget Sound Region, Washington DNR. Started on private land one mile east of Rochester, WA. Timber, brush and short grass. Moderate fire behavior.

Northern Rockies Area (PL 5)

New fires:	27
New large incidents:	5
Uncontained large fires:	12
Area Command teams committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	7

Area Command Team (Sexton) is managing large fires on the Lolo National Forest and Flathead Reservation.

Lolo Peak, Lolo NF. IMT 1 (Poncin). Ten miles southwest of Lolo, MT. Timber. Active fire behavior with running, flanking and smoldering. Residences threatened. Evacuations, road, trail and area closures in effect.

Sapphire Complex, (3 fires), Lolo NF. IMT 2 (Almas). Fifteen miles southeast of Clinton, MT. Timber. Active fire behavior with wind-driven runs, torching and spotting. Structures threatened. Evacuations, road, trail and area closures in effect.

Rice Ridge, Lolo NF. IMT 2 (Thompson). Six miles north of Seeley Lake, MT. Timber. Active fire behavior with group torching, short crown runs and spotting. Structures threatened. Road, trail and area closures in effect.

Sunrise, Lolo NF. IMT 1 (Lund). Eleven miles east of Superior, MT. Timber and brush. Moderate fire behavior with flanking, backing and single-tree torching. Structures threatened. Road, trail and area closures in effect.

Liberty, Flathead Agency, BIA. IMT 2 (Rohrer). Seventeen miles southeast of Arlee, MT. Timber. Active fire behavior with backing, flanking and group torching. Trail and area closures in effect.

* **Conrow**, Beaverhead - Deerlodge NF. Started on county land 7 miles northeast of Whitehall, MT. Timber, brush and tall grass. Extreme fire behavior with crowning and wind-driven runs. Structures threatened. Road, trail and area closures in effect.

Holmes Gulch, Central Land Office, Montana DNR. Three miles south of Helena, MT. Timber. Moderate fire behavior with backing and creeping. Residences threatened. Evacuations in effect.

Alice Creek, Helena – Lewis and Clark NF. IMT 2 (Bird). Fifteen miles northwest of Lincoln, MT. Timber and short grass. Active fire behavior.

Meyers, Beaverhead - Deerlodge NF. IMT 2 (Esperance). Twenty-five miles southwest of Philipsburg, MT. Timber. Moderate fire behavior with backing, flanking and single-tree torching. Structures threatened. Evacuations, road and area closures in effect.

Hanover, Nez Perce - Clearwater NF. IMT 2 (Bales). Four miles northeast of Florence, ID. Timber, brush and grass. Minimal fire behavior. Structures threatened. Road, trail and area closures in effect. Precipitation occurred over the fire area yesterday.

Sprague, Glacier National Park. IMT 2 (Hutton). Nine miles northeast of West Glacier, MT. Timber. Moderate fire behavior with backing, creeping and single-tree torching. Trail closures in effect.

Tamarack, Northwestern Land Office, Montana DNR. Started on Forest Service land 22 miles northwest of Marion, MT. Timber. Minimal fire behavior with creeping, torching and smoldering. Road closures in effect.

Wolverine, Blackfeet Agency, BIA. Ten miles northeast of St Mary, MT. Timber, brush and short grass. Minimal fire behavior. Structures threatened.

Mauer Mountain, Central Land Office, Montana DNR. Twenty miles south of Dillon, MT. Timber, brush and tall grass. Minimal fire behavior with creeping and smoldering. Structures and sage-grouse habitat threatened.

Blue Bay, Flathead Agency, BIA. Ten miles northeast of Polson, MT. Timber. Moderate fire behavior with isolated torching, creeping and smoldering. Road, trail and area closures in effect.

Mitchell, Miles City Field Office, BLM. Started on private land 18 miles southeast of Forsyth, MT. Timber, brush and grass. Active fire behavior with isolated torching, running and creeping. Sage-grouse habitat threatened.

* **Trail Creek**, Northern Cheyenne Agency, BIA. Eighteen miles southwest of Lame Deer, MT. Timber. Extreme fire behavior with uphill runs, spotting and isolated torching. Structures threatened.

* **1026**, Miles City Field Office, BLM. Started on private land 32 miles southwest of Miles City, MT. Timber, brush and short grass. Extreme fire behavior with wind-driven runs, long range spotting and group torching. Structures threatened. Evacuations in effect.

Predictive Services Discussion: Temperatures will rise quickly across the West as high pressure builds over the region. Isolated thunderstorms are possible over higher terrain of the Rockies and the Great Basin. Scattered showers and thunderstorms will move into the Midwest. Hurricane Harvey will continue to produce heavy rain, strong winds, and flooding along the coast and inland across Texas and Louisiana. Scattered thunderstorms will develop across the Southeast. Mild conditions will continue in the Northeast and Midwest.

Bees and Wasps

Firefighter Health & First Aid

In general bees sting to protect their hive and seldom sting when they are out foraging unless they feel threatened (like being swatted at or stepped on). On the other hand, a large number of bees or wasps foraging in one area may indicate a colony is nearby. If you intend to work or camp in the area, scout the area for bee/wasp habitat first.

Colonies vary in behavior over time, especially with changes in season, becoming more aggressive and easily agitated in the late summer and fall. You may pass the same colony for weeks and then one day provoke them unexpectedly.

● **Look out for colonies:**

Bees and wasps nest in a wide variety of locations, such as pipes, holes, behind shutters, under shingles, cracks and crevices within trees and rocks, and hanging from branches. Be alert for groups of flying bees entering or leaving an opening and listen for buzzing sounds. Be especially alert when climbing, digging fire line and moving logs. **DO NOT** put your hands where you can't see them.

Be particularly careful when using any heavy equipment that produces sound vibrations, such as chainsaws, weed eaters and pumps. **Keep escape routes in mind.**

!!! If you disturb a nest and are being attacked, run away. Use your shroud or shirt to protect your head neck and face. Swatting and waving your arms aggravates bees/wasps more!

● **About Africanized and European honey bees:**

Honey bees are about 5/8-inch long, brown, hairy insects with black encircling their abdomen, giving them a subtle striped appearance. All honey bees look alike. Only an expert can tell them apart.

The sting from a single Africanized honey bee is no more harmful than one from the common garden or European honey bee. Africanized honey bees are known as "killer bees" because they defend their nests more aggressively, with less provocation, and in larger numbers than the other honey bees, so there is a greater chance of receiving many stings.

Africanized honey bees are found in the southwest and are spreading across the south. You are more likely to be struck by lightning than being killed by Africanized bees.

● **Considerations with all bees and wasps:**

- 1) If a bee gets in the vehicle while you are driving. Stay calm, pull over and stop, let the bee out.
- 2) Keep trash away from your camp and keep it covered.
- 3) Look at what you are drinking and eating before you eat or drink. Bees and wasps are attracted to accessible food and water.

● **If you get Stung:**

The first thing you should do is remove the stinger. The end of a sting is barbed and will remain stuck in the skin even if the bee is removed. Muscles in the stinger allow it to continue pumping venom into the victim, even if it is no longer connected to the bee. Do not pull the stinger out with your fingers or tweezers because this will squeeze out more venom. Instead, scrape the stinger out with your fingernail, the edge of a credit card, a dull knife blade, or other straight edged object.

● **Two kinds of reactions are usually associated with bee stings and those of other stinging insects as well: (1) local or (2) systemic, allergic, or life-threatening.**

(1) Local Reactions:

A local reaction is usually characterized by pain, swelling, redness, itching, and a wheal surrounding the wound made by the stinger. Swelling can sometimes be locally severe. For instance, if stung on the finger, the arm may be swollen even up to the elbow. Swelling such as this is fairly common, even though it may be alarming. Swelling may be reduced by cooling the wound and/or taking an antihistamine such as Benadryl. Topical solutions such as calamine may also help alleviate pain.

(2) Systemic, Allergic, or Life-Threatening Reactions:

Allergic reactions can develop anywhere on the body and may include rash or hives, dizziness or headache, cramps, nausea, vomiting, swelling **not** in the general area of the sting, shortness of breath or difficulty swallowing, shock and unconsciousness. If you experience any of these symptoms, seek emergency medical assistance immediately. Symptoms can begin immediately following the sting or up to 30 minutes later and might last for hours.

● **If you know you are allergic:**

Anaphylaxis, if treated in time, usually can be reversed by epinephrine (adrenaline) injected into the body. Individuals who are aware that they are allergic to stings should carry epinephrine in either a normal syringe (sting kit) or an auto-injector (Epi-Pen) at all times when working outside **and communicate their allergy to supervisor/coworkers in case they become incapacitated.** Epinephrine is obtainable only by prescription from a physician.

● **Discussion Topics:**

- **Have you and your crew identified who is allergic to bee/wasp stings? Are they carrying their prescription Epi? Identify the Epi and its location to the rest of the crew.**
- **If you have an EMT on your crew/team, what are their protocols for treating stings and related allergic reactions?**
- **Discuss how you and your crew will safely flag or mark any identified nests/hives.**
