Predictive Services Discussion: The large, strong, and cold low pressure system will continue to move into the Pacific Northwest, Northern California, and the Northern Rockies bringing widespread rain and mountain snow along with breezy winds rotating counterclockwise around the low pressure area. To the south across the southern half of the Great Basin and California, a windy southwesterly flow will develop and will create pockets of critical fire weather conditions despite having only marginally low afternoon humidity levels. The breezy flow will continue east across the Great Plains toward the Great Lakes. Meanwhile off the East Coast, Jose will continue to spin a few hundred miles off the Jersey Shore possibly moving toward Long Island and Boston.

# DOWNHILL FIRELINE CONSTRUCTION 

 CHECKLISTOperational Engagement Category

Downhill fireline construction is hazardous in steep terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline, the following is required:

- Crew supervisor(s) and fireline overhead will discuss assignments prior to committing crew(s). Responsible overhead individual (TFLD or ICT4 qualified or better) will stay with resources until the job is completed.
- Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s).
- LCES will be coordinated for all personnel involved.
- Crew supervisor(s) is in direct contact with lookout who can see the fire.
- Communication is established between all crews.
- Ensure rapid access to safety zone(s) in case fire crosses below crew(s).
- Direct attack will be used whenever possible; if not possible, the fireline should be completed between anchor points before being fired out.
- Fireline will not lie in or adjacent to a chute or chimney.
- Starting point will be anchored for crew(s) building fireline down from the top.
- Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
- Can fire be carried with you?
