^{***} Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

<u>Predictive Services Discussion:</u> Showery conditions will continue across Texas, New Mexico, and Colorado as the remnants of Tropical Storm Pilar move northeast into the country from Baja California. Elsewhere across the Great Plains and western states expect warm and dry conditions with temperatures at or slightly above normal. Breezy northwesterly winds will be possible across the Great Lakes region and New England as a dry front moves southeast across both regions. Across the Southeast, dry conditions are expected under a cooler northerly flow.

COMMUNICATIONS (LCES)

Fire Communications Category

Effective communication is a critical backbone of safe and successful operations.

- Discuss the factors that can affect radio communication at the incident.
 - Knowledge of the radio issued to the individuals
 - Net control, frequencies
 - Line-of-sight restrictions
 - Antenna polarization effect (direction of the antenna)
 - Minimizing noise interference
 - Wide band narrow band
- How can you mitigate potential problems?
 - Implement effective communication procedures--be brief, use clear text, and tothe-point.
 - Give a good comprehensive briefing. (Refer to the Briefing Checklist inside the back cover of the Incident Response Pocket Guide.)
 - Confirm that relayed information is received, and understood.
 - Keep a continuous information flow (e.g., updates on weather, fire behavior, work progress; changes in strategy/tactics; arrival of additional resources; solicit feedback).
 - Establish emergency check-in procedures.
 - Provide a minimum of 4 radios per 20-person firefighter crew.
- The Five Communication Responsibilities for All Firefighters:
 - Brief others
 - Debrief your actions
 - Communicate hazards to others
 - Acknowledge messages
 - · Ask if you don't know
