Northern California Area (PL 3)

New fires:	6
New large incidents:	0
Uncontained large fires:	7
Type 1 IMTs Committed:	1

Central LNU Complex, Sonoma Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Gouvea). One mile north of Santa Rosa, CA. Brush and tall grass. Minimal fire behavior. Road closures in effect.

Southern LNU Complex, (3 fires). Sonoma Lake Napa Unit, Cal Fire. One mile east of Napa, CA. Timber, brush and short grass. Minimal fire behavior. Residences threatened. Evacuations, road and area closures in effect.

^{**}Uncontained large fires include only fires being managed under a full suppression strategy.

Bear, San Mateo-Santa Cruz Unit, Cal Fire. Five miles northeast of Boulder Creek, CA. Timber. Minimal fire behavior. Road closures in effect.

Mendocino Lake Complex, (2 fires). Mendocino Unit, Cal Fire. One mile west of Potter Valley, CA. Timber, brush and grass. Minimal fire behavior.

^{***} Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion: Warmer and drier conditions are expected across the West as a strengthening ridge of high pressure off shore begins to move inland. While afternoon humidity levels will be very dry across California, the off shore wind flow will be generally light. One area to watch will be Northern California where a northerly down sloping wind could produce pockets of critical fire weather conditions. A passing trough of low pressure will bring cooler and breezy conditions to the northern Great Plains. Wet conditions are expected across the Southeast as a passing low pressure area pulls moisture in form the Gulf of Mexico. By late afternoon, moisture is expected to spread northeast into the Mid-Atlantic States.

^{***}Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/

Leadership Environment

Leadership Category

Leadership is defined as the act of influencing people in order to achieve a result. The leadership environment is made up of critical elements that a successful leader must consider in planning for effective action. Those critical elements are:

- YOU the leader, who is ultimately responsible for all action and results.
- YOUR PEOPLE those that you are responsible for.
- SITUATION comprised of the many unique variables that influence a leader's decision such as objectives, conditions, resources available, organizational influences, and others affected by the action.
- CONSEQUENCES the short and long-term effects of your actions.

Leaders constantly assess the elements of the leadership environment and adapt accordingly. Successful leaders understand the interplay of these variables and demonstrate flexibility in selecting appropriate leadership tools and techniques as a situation changes.

Discussion Points

- Each mission has a different level risk. Discuss how the 4 leadership environment elements affect perceived risk in a changing environment.
- Each situation is unique and changes over time. Discuss what changes you might predict in your environment today.
- Discuss what leadership tools might be appropriate for those predicted changes today.
