**Predictive Services Discussion:** The strengthening, warm, dry, and stable ridge of high pressure will remain firmly anchored over the West and will produce temperatures that are more than 10 degrees above normal for most areas west of the Continental Divide. That said, strong temperature inversions are expected to develop in many of the lower and especially narrow valleys and canyons. Given the time of year and low sun angle, many of these will not break out. A cool, breezy, and dry northerly flow will continue across the Great Plains as the deep trough over the East should keep temperatures below normal along and east of the Mississippi River.

## Escape Routes

*Operational Engagement*

It's 1400...you have been working all morning. How far away have your safety zones become? Safety zones are only good if you can reach them. How long will your escape route take? What is the condition of the crew? How long will it take your slowest member to get there? Are your expectations realistic?

Look at the times below...if your fire blew up right now, can you and every member of your crew make it to your safety zone?

**Only Minutes**

Loop, Griffith Park - **5 min**  
Dude - **8 min**  
South Canyon - **9 min**  
Rainbow Springs, Spanish Ranch - **10 min**  
Hauser Creek - **11 min**  
Cart, Blackwater - **15 min**  
Pepper Run - **17 min**  
Cramer - **24 min**  
Rock Creek - **30 min**  
Tuolumne - **39 min**  
Battlement Creek - **48 min**  
Thirty-mile Canyon - **50 min**  
Yarnell Hill - **52 min**  
Blue Ribbon - **60 min**
