National Interagency Coordination Center Incident Management Situation Report Tuesday, April 17, 2018 – 0800 MT National Preparedness Level 2

National Fire Activity	
Initial attack activity:	Light (170) new fires
New large incidents:	8
Large fires contained:	10
Uncontained large fires:**	18
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2
**I Incontained Iorga fires include and	fires hains managed

**Uncontained large fires include only fires being managed under a full suppression strategy. Link to Geographic Area daily reports.

Southern Area (PL 3)

New fires:	112
New large incidents:	6
Uncontained large fires:	14
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

Rhea, Oklahoma DOF. Florida IMT 1 (Mousel). One mile west of Rhea, OK. Tall grass and brush. Active fire behavior with single tree torching, spotting and short crown runs. Numerous structures threatened.

34 Complex, Oklahoma DOF. IMT 2 (Parrish). Six miles north of Woodward, OK. Tall grass and brush. Minimal fire behavior with smoldering and creeping. Numerous residences threatened.

Carbon, Texas A & M Forest Service. Started on private land seven miles east of Shamrock, TX. Tall grass, brush and short grass. Moderate fire behavior. Numerous residences threatened. Road closures in effect.

Spoonbill, Big Cypress National Preserve, NPS. Thirty miles east of Naples, FL. Southern rough and tall grass. Minimal fire behavior with smoldering.

Walston, Texas A & M Forest Service. Started on private land one mile south of Mason, TX. Brush and tall grass. Moderate fire behavior. Structures threatened. Reduction in acreage due to more accurate mapping.

CR 26, Texas A & M Forest Service. Started on private land eleven miles northeast of Shamrock, TX. Tall grass and timber. Moderate fire behavior. Structures threatened.

Gate Mountain, George Washington & Jefferson NF. Eight miles west of Timberville, VA. Hardwood litter and brush. Minimal fire behavior. Residences threatened.

Harbor Bay, Texas A & M Forest Service. One mile northwest of Fritch, TX. Tall grass and brush. Moderate fire behavior. Residences threatened.

* **2473**, Texas A & M Forest Service. Three miles southeast of Lefors, TX. Tall grass and brush. Moderate fire behavior. Structures threatened.

* **High Plains**, Texas A & M Forest Service. Started on private land three miles north of Fritch, TX. Tall grass. Active fire behavior with running. Structures threatened. Evacuations in effect.

* **Check Point**, Texas A & M Forest Service. Started on private land two miles southwest of Gillett, TX. Tall grass and brush. Active fire behavior with running.

Clear Creek, Osage Agency, BIA. Seven Miles South West of Pawhuska, OK. Timber. No new information.

Cali, Osage Agency, BIA. Eleven miles west of Skiatook OK. Timber. No new information.

Bruner.	Okmulgee Field Office	BIA. Eight miles south of Mannford, OK	K. Hardwood litter. No new information.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/

Predictive Services Discussion: Critical fire weather conditions will continue across the southern Rockies and the southern High Plains. The worst conditions will extend from eastern Arizona, across New Mexico, eastern Colorado, western Kansas, western Oklahoma, and much of West Texas. A strong cold front will move through the Rockies into the southern and central Plains. High winds with gusts to 60 mph, very dry air, and unstable conditions will be the primary factors. Behind the front, rain and snow will spread across much West Coast, the central and northern Great Basin, and the northern Rockies. In the East, a storm system moving into eastern Canada will keep a wintery mix of weather across the Great Lakes to New England. Temperatures will remain cool to mild across the West, the northern Plains, the Midwest, and the Northeast. The southern Plains and the Southeast will remain warm to hot. In Alaska, scattered showers are possible in the South as a weak front move into the state. Otherwise, mild conditions will continue in the Interior and South while cold remains in place on the North Slope.

Roadside Incident Response

Vehicles/Roads Category

Nationally, the number of injuries and fatalities among emergency responders who are responding to roadside incidents is increasing. Although most wildland fires occur in remote areas, there are situations where wildland fire personnel are responding to fires along rural country roads, jeep roads, or major highways; the risk still exists for our firefighters. Below is a checklist of considerations that should be utilized when responding to fires along roadsides:

Considerations

- Firefighter and public safety will always be the number one priority.
- Utilize L.C.E.S. in all incident activities.
- Personal Protective Equipment is to be used on all incidents.

Upon Arrival at the Scene

Size up incident – see Incident Response Pocket Guide

- What has happened?
- What is happening?
- What will or could happen?
- Is this a HazMat situation?

Risk Management Process

• Decision Point, Go/No-Go. See the Incident Response Pocket Guide, page 1

Tactical Considerations

- Anytime traffic flow is affected by the incident, contact the jurisdictional law enforcement agency for assistance.
- Conduct all operations as far from traffic lanes as possible to provide for crew and public safety.
- Park units on the same side of the roadway whenever possible to avoid traffic congestion.
- Personnel do not exit the fire apparatus until instructed to do so by the module leader.
- Exit the fire apparatus away from the roadway or where hazard exposure is minimized.
- Exit the fire apparatus with full personal protective equipment.
- Post a lookout to watch for and control oncoming traffic.
- Utilize forward and rear spotters when visibility is impaired or road conditions warrant.
- Utilize and place road flares or other traffic warning signs whenever possible.
- If equipment needs to be removed from the traffic side of the apparatus, one person will retrieve the equipment and a lookout will watch for oncoming traffic.
- Engine operators will operate pumps from the non-traffic side or from the cab of the apparatus when possible. Keep all hose, fire tools, and equipment out of traffic lanes when possible.
- During night operations utilize reflective clothing, vests and other safety equipment as necessary.
- All emergency responses on roadways will be concluded as quickly as possible to reduce personnel exposure.
- Cancel or demob unnecessary apparatus as soon as possible.

** Each agency emergency vehicle operator will follow their particular state laws and agency policies governing the operations of emergency vehicles.
