

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, April 18, 2018 – 0800 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (95) new fires
New large incidents:	5
Large fires contained:	5
Uncontained large fires:**	18
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires:	27
New large incidents:	3
Uncontained large fires:	13
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

Rhea, Oklahoma DOF. Florida IMT 1 (Mousel). One mile west of Rhea, OK. Tall grass and brush. Active fire behavior with short crown runs and short-range spotting. Numerous structures threatened.

34 Complex, Oklahoma DOF. IMT 2 (Parrish). Six miles north of Woodward, OK. Tall grass and brush. Active fire behavior with torching, smoldering and creeping. Numerous residences threatened.

* **McClellan**, Texas A&M Forest Service. Started on private land fourteen miles west of Groom, TX. Grass and brush. Extreme fire behavior with running and long-range spotting. Residences threatened.

Spoonbill, Big Cypress National Preserve, NPS. Thirty miles east of Naples, FL. Southern rough and tall grass. Minimal fire behavior with smoldering.

* **Mashunkashey**, Osage Agency, BIA. Three miles north of Pawhuska, OK. Short grass and hardwood litter. Extreme fire behavior. Residences threatened.

Harbor Bay, Texas A & M Forest Service. One mile northwest of Fritch, TX. Tall grass and brush. Moderate fire behavior. Residences threatened.

Gate Mountain, George Washington & Jefferson NF. Eight miles west of Timberville, VA. Hardwood litter and brush. Minimal fire behavior. Residences threatened.

2473, Texas A & M Forest Service. Three miles southeast of Lefors, TX. Tall grass and brush. Moderate fire behavior. Structures threatened.

High Plains, Texas A & M Forest Service. Started on private land three miles north of Fritch, TX. Tall grass. Moderate fire behavior. Structures threatened.

* **Matagorda Island**, Matagorda National Wildlife Refuge. Eight miles southwest of Port O'Connor, TX. Grass. Active fire behavior with running, backing and smoldering.

Buzzard, Big Cypress National Preserve, NPS. Previously reported incident. Twenty-five miles northeast of Ochopee, FL. Southern rough, timber and tall grass. Last report unless significant activity occurs.

Clear Creek, Osage Agency, BIA. Seven Miles South West of Pawhuska, OK. Timber. No new information. Last report unless new information is received.

Cali, Osage Agency, BIA. Eleven miles west of Skiatook OK. Timber. No new information. Last report unless new information is received.

Bruner, Okmulgee Field Office, BIA. Eight miles south of Mannford, OK. Hardwood litter. No new information. Last report unless new information is received.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: High pressure will build across the Plains and much of the Interior West while one storm system moves through the Midwest and another enters the West Coast. Slightly cooler and less windy conditions will bring some relief from critical fire conditions to the southern Plains and Southwest. A storm system entering the West will bring mixed rain and winter precipitation to California, the Pacific Northwest, and the northern Rockies. The Midwest, the Appalachians, and New England will also get wintery mix as a strong storm system moves across the region. Temperatures will remain mild across much of the West, slightly cooler in the Southwest but still very warm, cold from the Great Lakes to New England, and very warm in the Southeast. Alaska will remain mostly dry with some rain and snow showers along the southern coast. Temperatures will continue seasonal throughout the Interior and the South but very cold on the North Slope.

Unburned Fuel Between You And The Fire

Operational Engagement Category

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical for direct attack on a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire or are you in contact with someone who can? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- Are weather indicators constantly changing?
- To reduce the risks:
 - Post lookouts
 - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
