

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, April 24, 2018 – 0800 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Moderate (215) new fires
 New large incidents: 6
 Large fires contained: 3
 Uncontained large fires:** 10
 Area Command teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2

*Nationally, there are 3 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires: 68
 New large incidents: 4
 Uncontained large fires: 4
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 1

Rhea, Oklahoma DOF. Florida IMT 1 (Mousel). One mile west of Rhea, OK. Tall grass and brush. Minimal fire behavior with creeping and smoldering.

34 Complex, Oklahoma DOF. Transfer of command from IMT 2 (Parrish) back to the local unit will occur on 4/25. Six miles north of Woodward, OK. Tall grass and brush. Minimal fire behavior with smoldering.

Rattlesnake Holler, Northeast Area, Oklahoma DOF. Four miles southwest of Jay, OK. Timber. Minimal fire behavior with smoldering. No new information.

* **Nickel Branch**, Virginia DOF. Started on private land four miles southwest of Nora, VA. Timber grass and understory. Minimal fire behavior. Numerous residences threatened.

* **Wilber**, Florida DOF. Twenty-two miles northeast of Lorida, FL. Southern rough. Minimal fire behavior. Last report unless significant activity occurs.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: The high pressure ridge over the western states will intensify which will lead to an intensification of the low pressure area over the eastern states. Expect for temperatures across the West to be nearly 10 degrees above average while temperatures in the East remain below average. Scattered showers will be possible across Oregon and the Great Basin as a weak disturbance moves east through the ridge. In addition, there might be a few lightning strikes in the northern Sierras during the afternoon period. In Alaska, the low pressure area over the Bering Sea will intensify as it moves east of the Pribilof Islands toward the coast. Showers will be on the increase across the interior trending toward rain showers in the east and snow showers across the southwestern areas. <http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

Unfamiliar With Weather And Local Factors

Weather - Fire Behavior Category

Ask questions of local experts! What kinds of questions would you ask?

Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?

Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?

Is there any other way to obtain information? List common sources of information on weather and local factors. (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)

To reduce risks:

- Base all actions on current and expected fire behavior.
- Post lookouts.
- Establish escape routes and safety zones.
- Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things – southeast or Alaska).
- Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking).
