

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, April 28, 2018 – 0800 MT  
National Preparedness Level 2**

**National Fire Activity**

|                               |                      |
|-------------------------------|----------------------|
| Initial attack activity:      | Light (86) new fires |
| New large incidents:          | 1                    |
| Large fires contained:        | 1                    |
| Uncontained large fires:**    | 5                    |
| Area Command teams committed: | 0                    |
| NIMOs committed:              | 0                    |
| Type 1 IMTs committed:        | 1                    |
| Type 2 IMTs committed:        | 1                    |

Nationally, there are 4 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** An upper level low pressure will move inland in to the Pacific Northwest from the coast bringing much cooler temperatures and precipitation to the northwestern portion of the country. Scattered wet convection is expected along the eastern edge of the system over Montana and Idaho. Pockets of critical fire weather conditions will be possible across southern Nevada and Utah as breezy winds interact with low humidities. Isolated convection will be possible along the Continental Divide in New Mexico and Colorado during the afternoon. In the East, overall cooler than average conditions will continue. In Alaska, the wet pattern will continue as lingering showers across the Interior are reinforced by another system that will be approaching the southwestern coast by afternoon. Very windy conditions are expected in the Aleutian Islands. <http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

## ATV – Transport

*Vehicles/Roads Category*

### **ATV Loading/Unloading**

Loading/unloading of ATVs has resulted in serious injury and even death to employees. Only those who have been fully trained in ATV operations should conduct loading/unloading procedures. The following safety measures are recommended:

- Wear all PPE (including gloves, helmet, etc.) until ATV is either secured or unloaded.
- Ensure header board (board placed in front of bed of truck or trailer) is in place and in good condition.
- ATV tire ramps should be secure to trailer or tail gate and on level terrain.
- If possible, use a tilt trailer to haul an ATV. If this is not feasible, try to lower back end of vehicle so slant of loading ramp is reduced. Back into ditch, hillside, or anything else to try and lower back end of vehicle.
- When loading ATV onto vehicle or trailer, keep seated, and lean body weight forward on ATV.
- When unloading ATV, keep seated and keep weight forward. This helps keep ATV from flipping over backwards.
- Never load or unload an ATV with a load on the racks. Load all ATVs empty.

### **Securing ATV for transport**

ATVs improperly loaded can be dangerous to you and other highway users. Steering can be affected if your load is not properly distributed and if not properly secured, can become dislodged and damage equipment and cause injury or death during a quick stop or crash.

### **Drivers are responsible for their load –regardless who actually loads equipment. All drivers are responsible for:**

- inspecting the ATV,
- recognizing overloads and poorly balanced weight, and
- knowing the gear loaded on the ATV is securely tied down.

### **Securing ATV's:**

- Secure ATV in its normal operating position (on all four wheels)
- Set the parking brake and place transmission in gear
- Turn fuel valve OFF
- Use chocks (that fit snugly against wheels) in front and back of ATV. Front end header boards should also block forward movement of ATV.
- Tie down ATV on at least each corner – use tie downs made from one inch nylon strap or greater, with hooks at each end and that have ratcheting buckles (ordinary rope should not be used due to stretching) or tie down straps that will lock in place
- ATVs should never be hauled with a load attached to the cargo racks. Hazard exists of losing the load from the ATV while in transit.
