

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, April 30, 2018 – 0800 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Light (190) new fires  
 New large incidents: 2  
 Large fires contained: 0  
 Uncontained large fires:\*\* 6  
 Area Command teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 1  
 Type 2 IMTs committed: 0

Nationally, there are 4 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southwest Area (PL 3)**

New fires: 11  
 New large incidents: 1  
 Uncontained large fires: 2  
 Type 1 IMTs committed: 1

**Tinder**, Coconino NF. IMT 1 (Day). Twenty miles northeast of Pine, AZ. Timber. Extreme fire behavior with wind-driven running and spotting. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

\* **Escondido Tanks**, Las Cruces Field Office, BLM. Fifteen miles southeast of Orogrande, NM. Tall grass. Minimal fire behavior with smoldering.

**Rattlesnake**, Fort Apache Agency, BIA. Twenty-four miles southwest of Alpine, AZ. Timber. Active fire behavior with torching, spotting and backing. Road, area and trail closures in effect.

**OK Bar**, Socorro District, New Mexico State Forestry. Forty miles south of Animas, NM. Brush and short grass. Extreme fire behavior with uphill runs. Last narrative report unless significant activity occurs.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** Overall cooler than average conditions are expected across the West as the upper level low pressure area and trough move further inland. Widespread wetting rainfall will be possible across the Pacific Northwest and the Northern Rockies. Scattered showers are expected across the Great Basin and Northern California. Critical fire weather conditions will be possible across New Mexico and southern Colorado as breezy southwesterly winds interact with low humidities. Some convection is possible along the state line with Texas. In Alaska, low pressure will move into the southwestern portion of the state bringing more wet conditions to the western Interior. The eastern Interior should remain mostly dry near the Yukon border.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

## Powerline Safety

*Miscellaneous Fireline Hazards*

Operating near or under power lines poses unique hazards, and the following precautions should be followed to reduce potential equipment damage or injury:

- If possible, the power company should deactivate lines in the fire area.
- Don't operate heavy equipment under power lines.
- Keep all aviation activity away from power lines. Inform air attack and/or other aviation resources of the location of the power lines.
- Don't drive with long antennas under power lines.
- Don't stand near power lines during retardant drops.
- Don't park under power lines. The magnetic field around energized power lines can induce an electrical charge in ungrounded vehicles or equipment. This charge can shock anyone who touches the vehicle.
- Don't apply straight stream to power lines.
- All personnel should be cautioned that smoke may become charged and conduct the electrical current. Deactivated transmission and distribution lines may continue to pose a hazard due to induction.
- If power lines fall on your vehicle, DON'T leave the vehicle until the power company arrives. If the vehicle is on fire or fire is near, jump clear, don't hang on, keep feet together, and bunny hop away.
