National Interagency Coordination Center Incident Management Situation Report Tuesday, May 1, 2018 – 0800 MT National Preparedness Level 2

National Fire Activity

Initial attack activity:

New large incidents:

Large fires contained:

Uncontained large fires:**

Area Command teams committed:

NIMOs committed:

Light (170) new fires

2

Command:

0

0

0

Type 1 IMTs committed: 2
Type 2 IMTs committed: 0

Nationally, there are 4 large fires being managed under a strategy other than full suppression. **Uncontained large fires include only fires being managed under a full suppression strategy. Link to Geographic Area daily reports.

Southwest Area (PL 3)

New fires:	5
New large incidents:	0
Uncontained large fires:	3
Type 1 IMTs committed:	1

Tinder, Coconino NF. IMT 1 (Day). Twenty miles northeast of Pine, AZ. Timber. Active fire behavior with wind-driven runs and short-range spotting. Numerous residences threatened. Road, area and trail closures in effect.

Escondido Tanks, Las Cruces Field Office, BLM. Fifteen miles southeast of Orogrande, NM. Tall grass. No new information.

Rattlesnake, Fort Apache Agency, BIA. Twenty-four miles southwest of Alpine, AZ. Timber. Moderate fire behavior with backing, flanking and smoldering. Road, area and trail closures in effect.

OK Bar, Socorro District, New Mexico State Forestry. Forty miles south of Animas, NM. Brush and short grass. Extreme fire behavior with uphill runs. Last narrative report unless significant activity occurs.

^{***} Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/

Predictive Services Discussion: A cool, northwesterly flow pattern will continue to produce below average temperatures across a majority of the West as the previous day's low pressure area moves northeast toward south central Canada. Scattered showers will continue across the central and northern Rockies. Lingering critical fire weather conditions will be possible across both Arizona and New Mexico as breezy southwesterly winds continue to interact with low humidities in the afternoon. In the east, warm and dry conditions are expected as the ridge of high pressure lingers over the Appalachian Mountains. In Alaska, the previous day's system will fall apart as it crosses the Alaska Range. However, the shower activity associated with it will linger and spread across the entire interior as the wet pattern continues.

Aircraft and Pilot Carding

Aviation Category

Every aircraft and pilot used in support of a Federal wildland fire mission must have a current Aircraft and Pilot Card or letter of authorization. The card must be held in the aircraft or with the pilot, and give specific authorization to do the mission being requested.

These missions could be all, one, or any number of missions as follows:

- Air attack (Level I, Level II, Level III)
- Reconnaissance
- Fire surveillance
- Water Delivery (buckets)
- Helitorch
- Cargo
- Longline
- PSD Operations

Every pilot who flies a properly carded aircraft must possess a current Interagency Airplane or Helicopter Pilot Qualification Card that gives specific authorization to fly the type of mission being requested and for the specific type of aircraft being used for the mission.

These missions could be all, or any number of missions as follows:

- Air attack
- Reconnaissance
- Fire surveillance
- Low-level
- Paracargo
- Mountain/Remote airstrips
- Smokejumper
- Longline

Before the aircraft and pilot can be used for a specific mission, the aircraft must be specifically listed on a valid and current contract for the type of work being performed and a copy of the contract must be onboard the aircraft.

Each user of the aircraft and pilot has the authorization to physically inspect the Aircraft Data Card, the Interagency Airplane or Helicopter Pilot Qualification Card, and the contract. If any one of these three are not available for inspection, the mission must be cancelled or at least postponed until the authorizations of the aircraft, pilot, or contract can be determined.

Pilots have very specific and closely monitored duty time and flight time limitations that users must understand and adhere to:

- 14-hour duty day
 8 hours flight time per day
 2 days off in 14 calendar days
 36 hours cumulative flight hours in any 6 consecutive days
