National Interagency Coordination Center Incident Management Situation Report Saturday, May 12, 2018 – 0800 MT National Preparedness Level 2

National Fire Activity

Initial attack activity: Light (87) new fires

New large incidents: 3
Large fires contained: 2
Uncontained large fires:** 7
Area Command teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 1
Type 2 IMTs committed: 1

Nationally, there are 6 large fires being managed under a strategy other than full suppression.

Link to Geographic Area daily reports.

Southern Area (PL 3)

| New fires: | 35 |
|--------------------------|----|
| New large incidents: | 2 |
| Uncontained large fires: | 6 |
| Type 1 IMTs committed: | 1 |
| Type 2 IMTs committed: | 1 |

Avian Complex, Big Cypress National Preserve, NPS. IMT 2 (Parrish). Fifteen miles northeast of Everglades City, FL. Southern rough and tall grass. Active fire behavior with running, spotting and torching. Numerous residences threatened. Road, area and trail closures in effect.

McDannald, Texas A&M Forest Service. IMT 1 (Dueitt). IMT is also managing the Mallard incident. Started on private land 21 miles west of Ft. Davis, TX. Brush and tall grass. Minimal fire behavior with smoldering and creeping. Numerous structures threatened. Area closures in effect.

^{**}Uncontained large fires include only fires being managed under a full suppression strategy.

Mallard, Texas A&M Forest Service. Started on private land 13 miles east of Wayside, TX. Brush and short grass. Extreme fire behavior with running, torching and wind-driven runs. Numerous structures threatened. Evacuations and road closures in effect.

* **Glover,** Texas A&M Forest Service. Started on private land 19 miles northeast of Silverton, Texas. Brush and tall grass. Moderate fire behavior with flanking, backing and single tree torching.

Hardwood, Texas A&M Forest Service. Started on private land 13 miles north of Turkey, TX. Brush and tall grass. Moderate fire behavior with backing, creeping and single tree torching. Reduction in acreage due to more accurate mapping.

Mechler, Texas A&M Forest Service. Started on private land 10 miles southeast of Amarillo, TX. Brush and short grass. Moderate fire behavior with backing, creeping and torching.

JA #2 East, Texas A&M Forest Service. Started on private land 50 miles southeast of Amarillo, TX. Brush and tall grass. Minimal fire behavior with backing and creeping. Reduction in acreage due to more accurate mapping.

***Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/

Predictive Services Discussion: The low pressure area over the Great Basin will move east toward the Central Rockies by afternoon. This will continue to create critical fire weather conditions across the southwest as the southwesterly wind flow continues to interact with very low humidities to enhance the burn environment across New Mexico, Arizona, and West Texas. To the north, widespread showers with embedded storms are expected across the eastern portion of the Great Basin, northern Colorado, and Wyoming. Further north, a warm ridge of high pressure will begin building into the Pacific Northwest and the Northern Rockies from the north and will allow for temperatures to return to being above normal. In the East, weak high pressure will remain in charge; however, scattered storms will be possible across the Appalachian foothills of the Carolinas in the afternoon. In Alaska, the low pressure area over the southeastern portion of the Bering Sea will begin to weaken. However, scattered showers will remain possible across western portions of the Interior and along the Arctic Coast east of Barrow.

Minutes FOR SAFETY

Chainsaw Safety

Felling Safety Category

Chainsaw safety is every saw operator's job.

- Always wear proper P.P.E. when handling or working around chainsaws.
 - Eye protection- approved goggles or safety glasses
 - Hearing protection ear plugs or muffs
 - Helmet
 - Chainsaw Chaps- proper size and length
 - Gloves-proper size
 - Long sleeve shirt-no loose sleeves
 - Leather boots-no loose boot laces
- Take the time to inspect the chainsaw before operating the saw.
 - Check the chain and bar- Sharpness of chain, Bar seated correctly
 - Check the bolts and screws all around the saw- no missing screws or bolts
 - Check the casing of the saw- no cracked or missing plastic
 - Felling axe and wedges in good condition
 - Saw gas and bar oil in sufficient quantities to meet objectives
 - Basic saw maintenance tools on site and specific to saw in use
 - Review fuel geysering indicators/potential
- Make sure you're aware of your surroundings while operating the chainsaw.
 - Look for and anticipate people working in your area the chainsaw operator is responsible for controlling the cutting area and communicating with others in the cutting area.
 - Look for any snags or overhead hazards in your area Maintain recommended spacing of falling teams or others working in the cutting area.
 - Establish consistent communications with spotters/swampers always minimize personnel working directly at the stump or in the felling area.
 - Are there other risk factors that increase the complexity of the job loose soils, rocky ground, steep terrain, weather factors or poor visibility, tree condition, others?
- Complete a personal Risk Assessment to determine if you are comfortable completing the task at hand – Don't let job performance pressure force you in over your skill level.
 - Proper training and certification level for personnel running saws and assisting with saw operations
 - Describe your medical response plan and how it is implemented including extricating a severe injury at the work site.
 - If you are not comfortable falling the tree walk away. Notify your supervisor and mitigate the safety issues or turn down the assignment.
