

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, May 29, 2018 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial Attack Activity: Light (58) new fires
 New large incidents: 1
 Large fires contained: 1
 Uncontained large fires:** 3
 Area Command teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 2

Nationally, there are 5 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: An upper low over the Interior West will drift slowly to the east. Scattered showers and thunderstorms will remain possible over the northern and central Rockies and spread into the northern Plains ahead of a weak cold front. Gusty winds and low humidity will continue to elevate hazardous fire conditions over the southern Rockies and spread into the eastern Plains of New Mexico. High pressure over the central and eastern U.S. will keep humid and hot weather in place. Scattered thunderstorms will form again over the eastern states from New England to the Southeast. A tropical storm in the Gulf will slowly drift north toward the central Gulf Coast, bringing heavy rain to the region from Mississippi to Florida. Temperatures will remain warm to hot across most of the eastern two-thirds of the nation. Hot weather will also spread into the southwest deserts, interior valleys of California, and the interior basins of Washington and Oregon. The Intermountain region will remain mild. In Alaska, a weak ridge will build, decreasing showers and thunderstorms to just the southeastern parts of the state. Temperatures will gradually rise with warm conditions over most of the state except cool to mild in the higher elevations in the South and across the North Slope.

LEAD Time

Leader's Intent

Leadership Category

In fast-moving, dynamic situations, top-level decision makers cannot always incorporate new information into a formal planning process and redirect people to action within a reasonable timeframe.

We provide leader's intent so people closest to the scene of action can adapt plans and exercise initiative to accomplish the objective when unanticipated opportunities arise or when the original plan no longer suffices.

Leader's intent is a crucial element of effective operations because it reduces internal friction and empowers subordinates—even when chaotic conditions prevent the chain of command from communicating effectively.

Leader's intent is a clear, concise statement about what people must do to succeed in their assignments. It delineates three essential components:

1. **Task** – what is the objective or goal of the assignment?
2. **Purpose** – why the assignment needs to be done.
3. **End state** – how the situation should look when the assignment is successfully completed.

Within the framework of the defined end state, leaders can develop plans that include incident objectives, priorities, strategies, trigger points, and contingency plans.

Discussion Points:

- How were you most recently provided leader's intent?
- Describe a situation where leader's intent was utilized to adapt and achieve the desired end state.
- Describe a situation where leader's intent was not clear.
- Discuss how to gain leaders intent if it is not initially provided.
