

**National Interagency Coordination Center  
Incident Management Situation Report  
Sunday, June 10, 2018 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial Attack Activity: Light (63) new fires  
 New large incidents: 11  
 Large fires contained: 7  
 Uncontained large fires:\*\* 23  
 Area Command teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 4  
 Type 2 IMTs committed: 0

Nationally, there are 16 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southwest Area (PL 4)**

New fires: 4  
 New large incidents: 1  
 Uncontained large fires: 7  
 Type 1 IMTs committed: 2

**Soldier Canyon**, Mescalero Agency, BIA. IMT 1 (Pierson). One mile northeast of Mescalero, NM. Timber, brush and medium logging slash. Minimal fire behavior. Area closures in effect. Evacuations have been lifted. Reduction in acreage due to more accurate mapping.

**Ute Park**, Cimarron District, New Mexico State Forestry. IMT 1 (Day). One mile east of Ute Park, NM. Timber, brush and short grass. Minimal fire behavior. Road, area and trail closures in effect. Evacuations have been lifted.

**Judd**, Southeast District, Arizona DOF. Transfer of command from IMT 2 (Sinclair) back to the local unit occurred yesterday. Three miles north of Bisbee, AZ. Brush and tall grass. Minimal fire behavior. Road, area and trail closures in effect.

\* **Emery Gap**, Cimarron District, New Mexico State Forestry. Eight miles north of Folsom, NM. Timber, brush and short grass. Active fire behavior with running and spotting. Residences threatened.

**Buzzard**, Gila NF. Ten miles east of Reserve, NM. Timber. Moderate fire behavior with backing, flanking and isolated torching. Structures threatened. Road, area and trail closures in effect.

**Sawmill**, Navajo Region, BIA. Ten miles north of Ft. Defiance, AZ. Timber and brush. Minimal fire behavior.

**377**, Apache-Sitgreaves NF. Five miles northeast of Heber, AZ. Timber and tall grass. No new information. Last report unless new information is received.

**Predictive Services Discussion:** An upper level low pressure system over the Pacific Northwest and Northern Rockies will continue to bring cool and showery conditions to northern Oregon, Washington, northern Idaho, and Montana. Scattered strong storms will be possible across eastern Montana along a passing cold front. In the Southwest, breezy and dry conditions will create pockets of critical fire weather across Arizona, southern Nevada, and southern Utah. The previous day's convection will move east into eastern New Mexico and West Texas. The high pressure ridge over the Great Plains will weaken slightly as it drifts eastward. Scattered showers and storms will be possible along its leading edge across the Ohio River Valley. In Alaska, high pressure will strengthen over the state and will dry out the airmass. Convective activity will decrease from previous days' levels...though a few strikes will remain possible in the Brooks Range and also along some of the peaks in the Alaska Range near Denali and Katmai.

## Unfamiliar With Weather And Local Factors

*Weather - Fire Behavior Category*

Ask questions of local experts! What kinds of questions would you ask?

Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?

Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?

Is there any other way to obtain information? List common sources of information on weather and local factors. (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)

### **To reduce risks:**

- Base all actions on current and expected fire behavior.
- Post lookouts.
- Establish escape routes and safety zones.
- Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things – southeast or Alaska).
- Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking).
