

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, June 11, 2018 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial Attack Activity: Light (83) new fires  
 New large incidents: 7  
 Large fires contained: 2  
 Uncontained large fires:\*\* 27  
 Area Command teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 3  
 Type 2 IMTs committed: 0

Nationally, there are 17 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southwest Area (PL 4)**

New fires: 8  
 New large incidents: 0  
 Uncontained large fires: 7  
 Type 1 IMTs committed: 1

**Soldier Canyon**, Mescalero Agency, BIA. IMT 1 (Pierson). One mile northeast of Mescalero, NM. Timber, brush and medium logging slash. Minimal fire behavior. Area closures in effect. Reduction in acreage due to more accurate mapping.

**Ute Park**, Cimarron District, New Mexico State Forestry. IMT 1 (Day). One mile east of Ute Park, NM. Timber, brush and short grass. Minimal fire behavior. Road, area and trail closures in effect.

**Emery Gap**, Cimarron District, New Mexico State Forestry. Eight miles north of Folsom, NM. Timber, brush and short grass. Active fire behavior with group torching, single-tree torching and spotting. Residences threatened.

**Buzzard**, Gila NF. Ten miles east of Reserve, NM. Timber. Moderate fire behavior with backing, flanking and torching. Structures threatened. Road, area and trail closures in effect.

**377**, Apache-Sitgreaves NF. Five miles northeast of Heber, AZ. Timber and tall grass. Minimal fire behavior. Residences threatened.

**Judd**, Southeast District, Arizona DOF. Three miles north of Bisbee, AZ. Brush and tall grass. Minimal fire behavior. Area and trail closures in effect. Reduction in acreage due to more accurate mapping.

**Sawmill**, Navajo Region, BIA. Ten miles north of Ft. Defiance, AZ. Timber and brush. No new information.

**Predictive Services Discussion:** Westerly flow will remain in place across the northern tier of the country from the West Coast to Minnesota as a weak secondary cold front begins to stall across southern Montana and North Dakota. Breezy winds south of the front along with low humidities may create areas of critical fire weather conditions across Wyoming. Across the Southwest, expect another very hot and dry day with single digit humidities and triple digit heat in the afternoon. In the East, the primary cold front associated with the low pressure area, now over south central Canada, will weaken the ridge of high pressure over the Mississippi River Basin. However, temperatures will remain above average. In Alaska, cooler than average temperatures along with a breezy northwesterly wind are expected across the state's interior. Convective activity will be mainly limited to areas along the US/Canadian Border.

## Hazardous Materials Encounters

*Miscellaneous Fireline Hazards*

Employees who may encounter hazardous materials in the field should be trained, as mandated by OSHA 1910.120 (q), First Responder Awareness Level. However, employees should always recognize that hazmat encounters require special precautions.

- Hazardous materials in the field include, but are not limited to:
  - Clandestine drug waste – waste as a result of “meth” labs, etc., which may look like common household trash at first glance. Drug lab waste can be identified by the presence of gallon plastic jugs, large plastic bags, 5-gallon buckets, and laboratory equipment (tubes and beakers).
  - Midnight dumping – may be recognized by the presence of barrels or other containers, discoloration of land, plants, or water, and/or dead vegetation and animals.
  - Transportation accidents – truck, rail, or pipeline accidents may result in the spillage or release of hazardous materials that may result in danger to life, property, or resources.
- In all instances, self-protection is your primary responsibility.
- Respond to all encounters by implementing the Three Rs:
  - **Recognize:** Attempt to identify the substance using the North American Emergency Response Guide, occupancy/location, placards/labels, container shapes/colors, and/or MSDS shipping papers.
  - **Retreat:** Move upwind, upgrade, or upstream; isolate the material; and deny entry to the site. Guidelines for isolation distances include: 150 feet for a minor incident (1 drum, 1 bag, etc.); 500 feet for a major incident (more than 1 drum, etc.); 300 feet for a residential and light commercial incident; 1,000 feet for an open area; 2,500 feet for an incident with BLEVE potential; 2,500 feet for the staging area (must be upwind with vehicles in a headed-out position).
  - **Report:** Notify your supervisor and agency dispatcher. Request hazmat assistance via a safe route.
