

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 12, 2018 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial Attack Activity: Light (126) new fires
 New large incidents: 3
 Large fires contained: 8
 Uncontained large fires:** 21
 Area Command teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 3
 Type 2 IMTs committed: 2

Nationally, there are 18 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

A Weatherford Fire Department firefighter who experienced a medical emergency while suppressing a wildfire within the Scenic Loop Complex near Fort Davis, TX passed away Sunday, June 10. The firefighting community extends condolences to the family and friends of the deceased.

Active Incident Resource Summary

Southwest Area (PL 3)

New fires: 20
 New large incidents: 1
 Uncontained large fires: 6
 Type 1 IMTs committed: 2

Soldier Canyon, Mescalero Agency, BIA. IMT 1 (Pierson). One mile northeast of Mescalero, NM. Timber, brush and medium logging slash. Moderate fire behavior with single-tree torching, flanking and backing. Area closures in effect.

Ute Park, Cimarron District, New Mexico State Forestry. IMT 1 (Day). One mile east of Ute Park, NM. Timber, brush and short grass. Minimal fire behavior. Road, area and trail closures in effect.

Buzzard, Gila NF. Ten miles east of Reserve, NM. Timber. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Road, area and trail closures in effect.

Emery Gap, Cimarron District, New Mexico State Forestry. Eight miles north of Folsom, NM. Timber, brush and short grass. Minimal fire behavior. Residences threatened. Reduction in acreage due to more accurate mapping.

377, Apache-Sitgreaves NF. Five miles northeast of Heber, AZ. Timber and tall grass. Minimal fire behavior. Residences threatened.

Judd, Southeast District, Arizona DOF. Three miles north of Bisbee, AZ. Brush and tall grass. No new information.

* **Willow**, Gila NF. Six miles east of Mogollon, NM. Heavy logging slash. Active fire behavior with short-range spotting, smoldering and backing. Last narrative report unless signification activity occurs.

Predictive Services Discussion: High pressure over the south central and southwestern portion of the country will amplify northward along the Pacific Coast into Canada. This will allow for increasingly warmer temperature across the western states. The main concern of the day, however, will be for convection across the Four Corner States and Nevada that will be scattered in coverage and a mix of dry and wet storms. The moisture source is from the remnants of a tropical system located in the eastern Pacific Ocean. Looking elsewhere, a stalled frontal boundary will lead to scattered storms from the Mid-Mississippi River Valley southwest through the Southern Plains. North of the boundary, expect a breezy westerly flow. In Alaska, the chances for isolated storms will return to the southeastern Interior as a low pressure area develops near Denali. Elsewhere across the state, expect overall dry and cool conditions.

Dozer/Plow Operations

Vehicles & Roads Category

Dozers/tractor plows provide suppression and support capability for fire operations. When working on or around dozers on the fireline, it is important to respect the following guidelines:

- Load/unload equipment from the transport in a safe manner on a level, stable surface.
- Park transport in an area free of fuel. Clear an area if needed to protect parked equipment.
- Do not sit or bed down near equipment. Walk around the equipment before starting or moving it.
- Lower the dozer blade and/or fire plow to the ground when the equipment is idling or stopped.
- When working a dozer or tractor plow, stay at least 100 feet in front or 50 feet behind the equipment.
- Allow no one but the operator to ride on the equipment.
- Never get on or off equipment while it is moving.
- Provide front and rear lights for equipment working at night or in heavy smoke.
- Provide lights and fluorescent vests to personnel working with dozer/tractor plow units.
- Use hand signals for direction and safety.
- Do not use a dozer or tractor plow without a canopy or brush guard, and radio communications.
- Operators will wear required PPE and carry a fire shelter.
- Be aware of different fuel types, rates of spread, and flammability.
- Watch for wetlands, steep slopes, rocks, ditches, and other obstacles that might stop the equipment.
- Do not get too far ahead of a firing crew during firing operations.
- Anchor the line to a secure firebreak and create a black line (burn out) until the fire is completely enclosed.
- Tractor plow operators should wear headgear protection for head, face, eyes, and ears while also providing radio reception and ventilation capabilities.
- Tractor plow crews should consist of a minimum of two people.
- When the dozer or tractor plow is equipped with a hand-clutch lever, always take equipment out of gear when mounting and dismounting.
