

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, June 17, 2018 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial Attack Activity: Light (74) new fires
 New large incidents: 4
 Large fires contained: 5
 Uncontained large fires:** 17
 Area Command teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 3

Nationally, there are 28 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Rocky Mountain Area (PL 3)

New fires: 8
 New large incidents: 2
 Uncontained large fires: 6
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2

Badger Creek, Medicine Bow-Routt NF. IMT 2 (Greer). Two miles northwest of Mountain Home, WY. Timber. Minimal fire behavior. Numerous structures and sage-grouse habitat threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

416, San Juan NF. IMT 1 (Pechota). IMT is also managing the Burro fire. Thirteen miles north of Durango, CO. Timber and brush. Minimal fire behavior. Numerous structures threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Burro, San Juan NF. Fourteen miles south of Rico, CO. Timber. Minimal fire behavior. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

* **Upper Mailbox**, Uncompahgre Field Office, BLM. Three miles northeast of Redvale, CO. Chaparral. Minimal fire behavior. Road closures in effect. Precipitation occurred over the fire area yesterday.

Buffalo, White River NF. Transfer of command from IMT 2 (Esperance) back the local unit will occur today. One mile west of Silverthorn, CO. Closed timber litter, medium logging slash and tall grass. Minimal fire behavior. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Bocco, Colorado River Valley Field Office, BLM. Three miles northwest of Wolcott, CO. Chaparral and short grass. Minimal fire behavior. Precipitation occurred over the fire area yesterday.

WEX – Weld County

Southwest Area (PL 3)

New fires: 7
 New large incidents: 0
 Uncontained large fires: 6

Ute Park, Cimarron District, New Mexico State Forestry. One mile east of Ute Park, NM. Timber and brush. Minimal fire behavior. Road, area and trail closures in effect.

Buzzard, Gila NF. Ten miles east of Reserve, NM. Timber. Minimal fire behavior. Structures threatened. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

San Antonio, Valles Caldera National Preserve, NPS. Eighteen miles northwest of Los Alamos, NM. Timber and short grass. Moderate fire behavior with creeping and smoldering. Structures threatened. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Cottonwood, Cimarron District, New Mexico State Forestry. Twelve miles north of Cimarron, NM. Timber, brush and short grass. Minimal fire behavior. Road closures in effect. Precipitation occurred over the fire area yesterday.

Soldier Canyon, Mescalero Agency, BIA. One mile northeast of Mescalero, NM. Timber, brush and medium logging slash. Minimal fire behavior. Area closures in effect. Precipitation occurred over the fire area yesterday.

377, Apache-Sitgreaves NF. Five miles northeast of Heber, AZ. Timber and tall grass. No new information. Last report unless new information is received.

Predictive Services Discussion: The Pacific Northwest, Northern Rockies, northern Great Basin, and portions of Northern California will experience numerous showers and wet storms today as a broad, upper level low pressure area, laden with moisture from the remnants of Hurricane Bud, remains parked over the region. Due to cloudcover and precipitation, temperatures will be approximately 10 degrees below average. Further south, critical fire weather conditions are expected across the southern tip of Nevada, northwestern Arizona, and southwestern Utah as breezy winds interact with low afternoon humidities. In the East, high pressure will intensify over the Mid-South leading to a hot and humid day. A significant surge of tropical moisture along the central Gulf Coast could lead to heavy rainfall from Central Texas to Mississippi. In Alaska, a warming southerly flow into the Interior of the state will allow for some moisture to upslope into ANWR to produce a few storms in the afternoon and evening. Other locations across the state should remain dry with slightly below average temperatures.

Unfamiliar With Weather And Local Factors

Weather - Fire Behavior Category

Ask questions of local experts! What kinds of questions would you ask?

Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?

Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?

Is there any other way to obtain information? List common sources of information on weather and local factors. (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)

To reduce risks:

- Base all actions on current and expected fire behavior.
- Post lookouts.
- Establish escape routes and safety zones.
- Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things – southeast or Alaska).
- Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking).
