

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, June 30, 2018 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

Initial Attack Activity: Light (91) new fires  
 New large incidents: 12  
 Large fires contained: 7  
 Uncontained large fires:\*\* 26  
 NIMOs committed: 1  
 Type 1 IMTs committed: 3  
 Type 2 IMTs committed: 2

Nationally, there are 23 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

\*1 Hectare = 2.47 Acres

**Predictive Services Discussion:** The upper level trough will move east of the Continental Divide by afternoon. Widespread showers and storms are expected across most of the Northern Rockies Region. High pressure extending east from the Pacific will keep California and western portions of the Great Basin hot and dry. The monsoonal push across the Southwest will intensify along the Mexican border from southeastern Arizona through West Texas. High pressure over the southern Great Plains will temporarily weaken as a cold front moves east toward the Great Lakes. The East will remain mostly hot and dry except across Georgia, Alabama, and Florida where scattered storms are expected in the afternoon. In Alaska, moisture trapped within a high pressure ridge over the Interior will lead to the development of scattered storms in the afternoon between the Brooks Range and the Alaskan Range. Wet conditions are expected along the northern Gulf Coast as low pressure moves east from the Alaskan Peninsula to Kodiak Island.

## Day 1 Introduction

Week of Remembrance June 30-July 6

*This Week of Remembrance is dedicated to all those who have fallen in the line of duty and is intended to serve as an opportunity to renew our commitment to the health, wellness and safety of wildland firefighters.*

On June 30, 2013 nineteen members of the Granite Mountain Hotshot crew lost their lives on the Yarnell Hill fire. Today we mark the five year anniversary of this tragedy and honor them with lessons and conversations that should help us to adjust to an ever-changing fire environment and allow us to strive for the best possible outcomes. An outcome where we all come off the line at the end of each shift safely. We are here today to honor and remember the lives of the nineteen lost on this tragic day, but we are also here to remember the lives of all fallen firefighters and to honor them throughout this week. The anniversaries of such events should signal a reminder for all of us to seek improvement and pursue successful outcomes.

**“We honor and remember through learning”**

**Brit Rosso  
Director, LLC**

Each tragic event impacts us. These events rip through our community and leave behind more questions than answers. How do we as a fire community remember and honor the lives of those who were lost on these fires? We need to keep talking about what happened in order to bring change. We need to be open with assessing what we’ve learned from these events and be proactive in implementing those lessons learned moving forward.

We are all struggling to understand and process the loss of any lives on the fireline, and each of us is impacted differently. We should challenge ourselves to learn what we can by reading the reports posted on the Lessons Learned Center website and engaging in honest, sometimes difficult, but always respectful conversations. Through facilitated conversations with our peers and subordinates this is where the learning will come about, this is how we will work

to reduce the chances of such tragic outcomes in the future. The inherent danger of our jobs makes it critical for us to learn, to take the lessons available out of these tragedies and implement them as a workforce and as individuals.

This year the Week of Remembrance focuses on medivacs and the lessons learned from recent medical incident responses. Changes that were brought forward out of the ashes of tragedy in an effort to reduce these unintended outcomes in the future. We will look at the proactive changes that have developed within our fire community. Changes that came because we as a workforce kept talking and striving for a different outcome. When we talk openly with each other, the result will create a safer work environment for all of us. We are experiencing far more intense fires each season, our seasons run longer each year and we cannot control this. Our workforce can control actions, decisions and hopefully outcomes if we engage in the learning process.

As a crew and an individual look critically at yourself and identify the areas where you can learn and grow.

- Be a part of the change that is needed to bring everyone safely off the fireline at the end of each shift.
- Prepare yourselves for the season ahead through your willingness to learn, change and grow.

*The topics, review, and resources for the NWCG “Wildland Firefighter Week of Remembrance” have been contributed by the Wildland Fire Lessons Learned Center, the Wildland Fire Leadership Subcommittee, the Interagency Helicopter Operations Subcommittee, interagency dispatchers, and many other field SMEs.*
