# National Interagency Coordination Center <br> Incident Management Situation Report <br> Monday, July 2, 2018 - 0530 MT <br> National Preparedness Level 3 

National Fire Activity
Initial Attack Activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (99) new fires
5
4
29
1
2
5

Nationally, there are 26 large fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

Two MAFFS C-130 airtankers and support personnel from the 302nd Airlift Wing (Colorado Springs, Air Force Reserve) have been deployed to Colorado Springs, CO in support of wildland fire operations.

*1 Hectare = 2.47 Acres

Predictive Services Discussion: High pressure over the southern Great Plains and the Southeast will begin to intensify as it slowly drifts northwest. Monsoonal moisture over the Southwest will move north along the western edge of the ridge into the Great Basin and should produce widely scattered dry and wet storms. Further north, a low pressure area will drop south along the Pacific Coast into the Pacific Northwest. While this will bring cooler than average temperatures to Washington, Oregon, and northern Idaho, winds will become breezy as the low begins to interact with the high pressure ridge building to the south. Critical fire weather conditions may be possible across the extreme northern Great Basin. A stationary front situated across the East will keep a potential for scattered storms going along the Appalachian Mountain Chain. In Alaska, a cold low pressure area along the Arctic Coast will keep a cool, westerly flow going across the Interior. Some convection may be possible up near ANWR and down in the Chugach and Wrangell Mountains.

## Day 3 <br> Getting the Right Information to Dispatch

## Week of Remembrance June 30-July 6

This Week of Remembrance is dedicated to all those who have fallen in the line of duty and is intended to serve as an opportunity to renew our commitment to the health, wellness and safety of wildland firefighters.

From the 9-line to the Pink Sticker to the Medical Incident Report, it is all about getting the right information to dispatch. The following are some helpful hints from wildland fire dispatchers:

Fireline personnel: Location information. Most cellular phones have the ability to plot GPS locations. Give the dispatcher your lat/long from your cell phone. Dispatch can convert the coordinates into useable format for air or ground resources.

Be clear and concise in giving initial information... remember that you are painting a picture of your scene for all those listening.

Follow the Medical Incident Report. Take as many radio "breaks" as needed while giving information.
Be prepared to answer additional questions from the Dispatcher or repeat information that may have been previously given. Know there is a process and try not to get frustrated with the amount of information needed.

Request status checks from the dispatcher if you think that may be necessary. You can set any length of time and do a short check in of status at that time with each other.

Don't be afraid to ask for estimated arrival times of responding units.
Remain calm and in control, knowing help is on the way and coming as quickly as
"We honor and remember through learning" possible.

Brit Rosso Director, LLC

## Dispatchers:

- Be prepared before you need to use the information/form etc. Have all guides/contacts and flow charts updated annually and practice with dispatchers preseason.
- Get help if needed from the Center Manager/Floor supervisor for instance to make phone calls and get the process started on the right track.
- Don't forget to have a backup plan (or a couple) in place (ground ambulance, pack out etc.)
- Be flexible. Things may change a lot as the incident progresses. Be patient. Also, be prepared for the request to be handled differently in different areas/counties/states.
- Include the new Medical Incident Report form - dispatcher's need to familiarize themselves with it and replace old forms with this one.
- Recommend reviewing the Gregg Creek incident https://www.youtube.com/watch?v=TnbVUWcvzQ\&feature=youtu.be

Action: Use the Medical Incident Report in your IRPG (pg 118-119) to practice calling in a medical emergency.
