

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, July 5, 2018 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

Initial Attack Activity:	Light (144) new fires
New large incidents:	4
Large fires contained:	4
Uncontained large fires:**	35
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	6

Nationally, there are 27 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 airtankers and support personnel from the 302nd Airlift Wing (Colorado Springs, Air Force Reserve) along with one MAFFS C-130 airtanker and support personnel each from the 153rd Airlift Wing (Wyoming, Air National Guard) and 152nd Airlift Wing (Nevada, Air National Guard) have been deployed to Colorado Springs, CO in support of wildland fire operations.

**Rocky Mountain Area (PL 4)**

New fires:	21
New large incidents:	1
Uncontained large fires:	8
NIMOs committed:	1
Type 1 Teams committed:	1
Type 2 Teams committed:	3

**Spring Creek**, Costilla County. IMT 2 (Greer) and IMT 2 (Esperance). Nine miles northeast of Fort Garland, CO. Timber, brush and tall grass. Moderate fire behavior with short crown runs, group torching and long-range spotting. Several communities threatened. Evacuations, road, area and trail closures in effect.

\* **Lake Christine**, Eagle County. IMT 2 (Almas). One mile northwest of Basalt, CO. Timber and brush. Extreme fire behavior with running and long-range spotting. Numerous structures, energy and communication infrastructure threatened. Road, area and trail closures in effect.

**Weston Pass**, Pike-San Isabel NF. IMT 1 (Pechota). IMT is also managing the Chateau fire. Nine miles southwest of Fairplay, CO. Timber and brush. Active fire behavior with crowning and flanking. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

**Divide**, Moffat County. Previously reported incident. Twenty-three miles northwest of Craig, CO. Grass. Extreme fire behavior with running and flanking. Residences and sage-grouse habitat threatened. Evacuations and road closures in effect.

**Chateau**, Teller County. Seven miles northwest of Cripple Creek, CO. Closed timber litter and tall grass. Minimal fire behavior with torching, backing and creeping. Numerous residences threatened. Evacuations have been lifted. Road, area and trail closures in effect.

**Badger Creek**, Medicine Bow-Routt NF. Two miles northwest of Mountain Home, WY. Timber. Active fire behavior with group torching, backing and smoldering. Numerous structures threatened. Area and trail closures in effect.

**416**, San Juan NF. NIMO (Reinarz). Thirteen miles north of Durango, CO. Timber and brush. Moderate fire behavior with torching and short-range spotting. Road, area and trail closures in effect.

**Burro**, San Juan NF. Fourteen miles south of Rico, CO. Timber. Moderate fire behavior with torching and creeping. Road, area and trail closures in effect.

**Predictive Services Discussion:** The massive ride of high pressure will begin to move into the West late in the morning and into the Four Corners region by afternoon. The width of this ridge will extend from just off the coast of California east to Bermuda in the Atlantic Ocean. That's about 5000 miles wide! Expect very hot and dry conditions under this ridge across the West and very hot and humid conditions across the East. The ridge will allow for the monsoon to strengthen over the Southwest and for moisture to begin feeding north into Wyoming and possibly Montana. The only part of the Lower 48 not impacted by the ridge will be the Pacific Northwest and most of Northern California, which will continue to be shielded from it by a trough located just off shore in the Pacific Ocean.

In Alaska, high pressure over Kotzebue and low pressure over the northern Gulf will continue to allow for cooler than average conditions across the eastern Interior. However, the high pressure ridge along the West Coast will move inland to Galena and will allow for a return to above average temperatures across the western Interior.

Day 6

## Leadership in Medevac Situations

**Week of Remembrance June 30-July 6**

*This Week of Remembrance is dedicated to all those who have fallen in the line of duty and is intended to serve as an opportunity to renew our commitment to the health, wellness and safety of wildland firefighters.*

It's July 5<sup>th</sup> and you just attended morning briefing and received your crew's assignment for the day. In your division breakout they mentioned that you would be operating in some "pretty gnarly terrain" filled with loose rocks and steep slopes. You brief the crew on the day's mission, get them going and then start to scout out what's ahead. All of a sudden you get a call from one of sawyers saying their saw partner has been hit by a rolling rock and is unconscious. WHAT DO YOU DO????

"Fire is a complex, dynamic, and often unpredictable phenomenon. Fire operations require mobilizing a complex organization that includes management, command, support, and firefighting personnel, as well as aircraft, vehicles, machinery, and communications equipment. While the magnitude and complexity of the fire itself and of the human response to it will vary, the fact that fire operations are inherently dangerous will never change. A firefighter utilizing the best available science, equipment, training, and working within the scope of agency doctrine and policy, can still suffer serious injury or death." [Federal Interagency Standards for Fire and Fire Aviation Operations, or 'Red Book' - Chapter 1, pg. 8](#)

The guiding doctrine for fire operations clearly states that the environment that we work in is filled with many unknown variables. As leaders it's our responsibility to adequately prepare ourselves and team members for the inevitable situations we will be faced with. Medevac situations add another level of complexity within our environment and usually tend to be chaotic in nature. Emotions run high, fog of war rolls in and often times it's a situation a lot of people haven't been involved with. During these situations it is imperative to be cognizant of your operational tempo and ensure you give clear leaders intent.

**Operational tempo:** is the speed and intensity of our actions relative to the speed and intensity of unfolding events in the operational environment. When life is threatened there is an obvious sense of urgency. Remember the 6<sup>th</sup> Standard Firefighting Order: Be alert. Keep calm. Think clearly. Act decisively.

**Clear leader's intent:** is the foundation to bringing order to chaos. It allows you to effectively give a clear task, purpose and end state. When the situation presents itself you may find yourself as the Incident within an Incident commander whether or not you're the Division, Crew Boss, or Squad Leader. You must rapidly evaluate the situation and build an organization to assist in patient care, transportation and communication.

**Action:** [Watch this video](#) (WFSTAR preparing for wildfire medevac) **then answer the following questions**

1. What are you doing preseason to train for medevac situations? Do you incorporate medevac scenarios into your sandtable exercises?
2. Does everyone understand the Medical Incident Report and the process involved? Is everyone prepared to act as the Incident Commander for a medical situation? What are some considerations when establishing a command structure to handle the situation?
3. What are some considerations to consider post medevac? How is the crew handling the situation? Is there a need for peer support or CISM?

**"We honor and remember through learning"**
